Riverline Regulatory, App Store, and Ecosystem Compliance Report

Independent Legal, Regulatory, and Platform Policy Research Brief — Not Legal Advice

Prepared for: Riverline Project Owner (No-Limit Texas Hold'em Study Workstation)

Date of Assessment: October 22, 2026

Jurisdictions Analyzed: State of Israel (Primary), European Union, United States, Russian Federation

Target Distribution Channels: Web App (Installable PWA), Desktop Host (Electron), Apple App Store (iOS/iPadOS/macOS), Google Play Store (Android)

Supported Interface Languages: English (EN), Russian (RU), Hebrew (HE — RTL with LTR Poker Notation)

Executive Overview of Coverage

This report delivers an evidence-first regulatory and platform-compliance examination across all six research questions specified in the Riverline project brief. Every statutory provision, regulator publication, app-store review guideline, payment processor restriction, and online poker operator Real-Time Assistance (RTA) rule is quoted from official sources and linked inline, with independent researcher assessments explicitly designated as `[Judgement]`.

Report Section	Core Focus & Deliverable	Overall Risk Rating
Executive Summary	The Three Biggest Risks (Game Night Money Tracker, "Live Decision" RTA/Store Mode, and Israeli Privacy/Consumer/Banking Scaling) & Master Matrix	**High (Unmitigated) → Low (Mitigated)**
1. App Stores (Q1)	Apple Guideline 5.3 & 3.1.1, Google Play Real-Money & Simulated Gambling Rules, Regional Age Ratings (AU R18+, FR 18+, KR 19+), Debt-Tracker Rules	**Medium (Study) / High (Debt Ledger)**
2. Israel Law (Q2)	Penal Law §§ 224–235, Supreme Court *CA 476/17 (Rafiach)*, Section 230 Social Exception vs. Section 233(3)(a) Two-Game Presumption, Procedure 411	**Low (Study) / High (Cash Tracker)**
3. RU, EU & US (Q3)	Russia 149-FZ Art. 15.1 & 244-FZ 24-Hour Blocking, 152-FZ Data Localization; EU GDPR, ePrivacy Art. 5(3) & EAA Art. 4(5); US UIGEA & State "Banker" Laws	**Med-High (RU) / Low-Med (EU & US)**
4. Poker RTA Rules (Q4)	PokerStars & GGPoker Security & Ecology Policies on RTA, Solvers, and Reference Charts; Renaming & Gating "Live Decision" Mode	**High (if "Live") / Low (if Off-Table)**
5. Documents & Licences (Q5)	Israel PPL § 11 & Amendment 13 Fines, Consumer Law §§ 13D/14C, IS 5568 Reg. 35 Exemptions, AGPLv3 Offline Solver Analysis, Stripe vs. MoR	**Medium (Requires Stage Gating)**
6. Age Ratings (Q6)	Statutory Minor Rules vs. Store Simulated-Gambling Age Ratings; Why 18+ (21+ Where Applicable) Is Mandatory	**Medium**
7. Checklists & Disclaimers	Three Stage-Gated Checklists (Friends Beta, Public Web, App Stores) + Trilingual Copy-Paste Disclaimers (EN / HE / RU)	**Implementation Ready**
8. Lawyer Review List	Ten Specific Statutory, Contractual, Tax, and IP Questions Requiring Licensed Legal Counsel	**Actionable Legal Brief**

Mandatory Legal Disclaimer: This document is prepared by an independent researcher for informational and product-planning purposes only and does **not** constitute legal advice. Laws, regulatory enforcement priorities, and platform policies evolve continuously. Consult a licensed Israeli attorney (and qualified international/IP counsel where indicated in Section 8) before public distribution, account data collection, or commercial monetization.

Executive Summary: The Three Biggest Risks and How to Handle Them

Riverline is architected as a local-first, browser-first, and desktop-first No-Limit Texas Hold'em study workstation ("the honest poker coach for the hands you actually play"), built in plain JavaScript with an Electron desktop host, localized in English, Russian, and Hebrew, and developed in Israel (`RIVERLINE_BRIEF.md` §§ 1–3). Across all surveyed jurisdictions—Israel, the European Union, the United States, and the Russian Federation—**a pure poker mathematics, hand reconstruction, strategy planning, and post-session drill application that involves zero real-money wagering, zero purchasable or cashable chips, and zero prizes is lawful to develop, distribute, and monetize** `[Judgement]`.

However, three specific product features and operational intersections described in the project brief create **high legal, financial, or platform-rejection exposure** if shipped without preventative product engineering and precise legal positioning `[Judgement]`:

1. The "Game Night" Home-Game Money Tracker Under Israeli Criminal Law, App Store Rules, and Payment Processor Policies (High Risk)

Under Chapter 12, Article 12 of the Israeli Penal Law, 5737-1977 (Sections 224–235), Israeli criminal courts classify Texas Hold'em played for money, money's worth, or any benefit (כסף, שווה כסף, או טובת הנאה) as a "prohibited game" (משחק אסור) unless all three cumulative conditions of the narrow social exemption in Section 230 of the Penal Law are satisfied (Chambers Gaming Law 2025 – Israel; Ashash Criminal Law Guide). Organizing a prohibited game carries up to three years' imprisonment (Section 225), playing carries up to one year's imprisonment (Section 226), and critically, under the statutory presumption in Section 233(3)(a) of the Penal Law, any private premises where a prohibited game is conducted **at least twice within six months** prior to an offense is legally presumed to be a "place of prohibited games" (מקום משחקים אסורים), which destroys the third cumulative condition of the Section 230 social defense. Furthermore, Section 235(a) of the Penal Law empowers police officers to seize any instruments, devices, or records (כלים או מכשירים, כרטיסים או כל דבר אחר) reasonably suspected of being used to organize or conduct a prohibited game.

Simultaneously, on the Apple App Store (Guideline 5.3) and Google Play Store (Real-Money Gambling, Games, and Contests Policy), embedding a monetary ledger that records buy-ins, rebuys, cash-outs, and "banker" debt settlements inside a poker application routinely triggers rejection for facilitating unlicensed real-money gambling. In the United States, the term **"banker"** also carries a specific criminal meaning under state statutes prohibiting "banked games" (such as California Penal Code § 330), while payment processors such as Stripe explicitly prohibit both gambling-adjacent services (including office pools and games of skill with cash prizes) and peer-to-peer money transmission.

- **How to Handle It (`[Judgement]`):** 1. **Make Points / Chips-Only Mode the Primary Architecture:** Frame the "Game Night" module as a **Home-Game Score & Stack Log** (or **Friendly Points Tracker**) that tracks unitless points or chip counts (`pts` / `chips` / `bb`) rather than monetary currency. 2. **Strip All Currency Symbols and Gambling-Debt Terminology:** Remove all currency signs (₪, `$`, `€`, `₽`, `£`) and replace high-risk terms (`"Buy-in ($)"`, `"Cash-out ($)"`, `"Money Owed"`, `"Settle Debts"`, `"Pay via Banker"`) with neutral mathematical terms (`"Initial Allocation"`, `"Reload"`, `"Final Count"`, `"Net Score Delta"`, `"Minimum-Transfer Reconciliation"`, `"Session Coordinator"`). 3. **Hard-Ban Rake or Fee Inputs:** Never include an input field for "rake", "house cut", "tip jar", or "hosting fee" inside the Game Night module, as taking any rake or commercial fee immediately makes a home game a felony across Israel, the US, and the EU. 4. **Keep Session Logs Strictly Local:** Store Game Night logs exclusively in the user's local browser/device storage (`localStorage` / `IndexedDB`) or user-exported local files. Never sync monetary or named third-party debt ledgers to Riverline's Supabase cloud servers, ensuring the developer never acts as a central repository of evidentiary gambling records or personal data of non-consenting third-party players under Israel's Protection of Privacy Law Amendment 13.

2. The Optional "Live Decision" Mode Under Online Poker RTA Bans and App Store Gambling-Aid Rules (High Risk)

Major online poker operators enforce zero-tolerance policies against **Real-Time Assistance (RTA)**, resulting in permanent account bans and full confiscation of player funds (PokerNews RTA Policy Analysis). Under PokerStars' Prohibited Programs, Tools and Services Policy, any tool that computes advanced equity calculations, range-versus-range simulations, or Game Theory Optimal (GTO) recommendations—or any tool *"designed specifically to ease referral to reference material"*—is **strictly prohibited while the PokerStars client is open**, regardless of whether the player has an active table open or whether the tool is run on a separate device (such as a phone or secondary monitor). Similarly, GGPoker's Security & Ecology Policy (Section 4) prohibits *"any software and/or reference material that provides advice and/or has an influence on your decision-making in real-time"*, permitting only a basic static starting-hand chart that contains no stack sizes, relative positions, or user-defined situations (PokerNews RTA Policy Analysis). Moreover, Apple App Store Guideline 5.3 explicitly rules that *"Illegal gambling aids, including card counters, are not permitted on the App Store."*

- **How to Handle It (`[Judgement]`):** 1. **Eliminate the Name "Live Decision Mode":** Even when accompanied by strong warnings (`RIVERLINE_BRIEF.md` Principle 6), naming a feature **"Live Decision" mode** is a self-inflicted compliance hazard. To an Apple or Google app reviewer, "Live Decision" sounds like an outlawed in-game gambling aid; to PokerStars or GGPoker game-integrity teams, it signals a purpose-built RTA lookup interface. Rename the mode to **"Quick Spot Lookup"**, **"Fast Hand Reconstructor"**, or **"Off-Table Spot Checker"**. 2. **Enforce Mandatory Off-Table Attestation Gates:** Require users to accept a clear click-through modal on first launch and whenever opening the Quick Spot Lookup module confirming that **all real-money and play-money poker clients are completely closed** across all devices. 3. **Implement Voluntary Process-Detection Self-Lock on Desktop:** In PokerStars' Prohibited Programs Policy, PokerStars explicitly notes: *"We are aware that some poker tools and calculators restrict their functionality if they detect our software running. This is to prevent their users being barred from play on our site."* In the Electron desktop application, implementing a lightweight local check that displays an "Off-Table Study Lock" screen when major poker client processes (`PokerStars.exe`, `GGPoker.exe`, `888poker.exe`, `partypoker.exe`) are detected running in memory provides the strongest possible safe-harbor proof that Riverline is a bona fide post-session study workstation.

3. Israeli Privacy Law Amendment 13, Consumer Cancellation Mandates, Banking Restrictions, and Russian Censorship When Scaling to Public Web and Paid Tiers (Medium-to-High Risk)

When Riverline transitions from a private local build to a public web release with optional Supabase accounts/sync and a paid tier, four regulatory regimes converge:

- **Israeli Privacy Enforcement (Protection of Privacy Law, 5741-1981, Amendment 13):** Effective August 14, 2025, Amendment 13 granted the Israeli Privacy Protection Authority (PPA) direct administrative fining powers. In August 2026 (*A.D Karting Hutzot*), the PPA fined a small Israeli business NIS 12,000 solely for operating a website registration form with an incomplete Section 11 privacy notice, and in September 2026 (*Beit Shemesh Municipality*), imposed a NIS 64,000 fine for failing to document an external IT service provider as a data "holder" (מחזיק) with mandatory security clauses (INPLP Enforcement Report).
- **Israeli Consumer Protection Law (Sections 13D, 14C, and 14I of the Consumer Protection Law, 5741-1981):** Selling a recurring subscription or paid service online to Israeli consumers constitutes a "remote marketing transaction" (עסקת מכר מרחוק) and a "continuous transaction" (עסקה מתמשכת), mandating a 14-day cancellation right (capped at a 5% or NIS 100 fee), a prominent **"Cancel Subscription" (ביטול עסקה)** button on the website, and cessation of billing within **three business days** of notice (Israel Consumer Council; Meiri Law).
- **Israeli Banking Procedure 411 & Payment Processor Restrictions:** Under **Bank of Israel Conduct of Banking Business Procedure No. 411** (Chambers Gaming Law 2025 – Israel), Israeli banks block transactions tied to unlicensed gambling, and Stripe's Prohibited and Restricted Businesses Policy rejects

merchants whose descriptions appear gambling-related. Additionally, under Israeli tax law, calling voluntary payments **"donations" (תרומות)** is unlawful/misleading unless the entity is a registered non-profit (*Amuta*) holding a Section 46 permit; for a commercial or solo developer, all supporter revenue is taxable business income requiring registration as an *Osek Patur* or *Osek Mursheh*.

- **Russian Federation Extra-Judicial Blocking (Federal Law No. 149-FZ Art. 15.1 & Federal Law No. 244-FZ):** Roskomnadzor and the Federal Tax Service (FNS) block poker websites extra-judicially within 24 hours if any page is deemed to facilitate online poker play or link to online poker rooms, and Federal Law No. 152-FZ Art. 18(5) mandates local Russian server storage for personal data collected from Russian citizens.

Compliance Domain	Governing Authority / Primary Source	Assessed Risk	Core Mitigation Strategy (`[Judgement]`)
Q1: App Store & Google Play (Study Core)	Apple Review Guidelines § 5.3; Google Play Gambling Policy	**Medium**	Categorize under Education / Reference or Card Strategy; declare no real-money value; use Apple IAP / Google Billing for all in-app digital tiers.
Q1: App Store & Google Play (Game Night Ledger)	Apple Review Guidelines §§ 1.4.5, 5.3; Google Play Gambling Policy	**High**	Ship as unitless **Points / Stack Log**; remove `$`/₪ symbols, `"buy-in"`, `"cash-out"`, and `"banker"` wording from UI and screenshots.
Q2(a): Israel — Poker Study Workstation	Israeli Penal Law §§ 224–226; Supreme Court CA 476/17 (*Rafiach*)	**Low**	Maintain zero wagering, zero entry fees for play, and zero prizes; frame strictly as game-theory and mathematical probability instruction.
Q2(b): Israel — Home-Game Money Tracker	Israeli Penal Law §§ 224–230, 233(3), 235; Ashash Law	**High**	Default to Points/Chips-Only Mode; never sync home-game ledgers to cloud servers; prohibit rake calculations; include Section 230 warning.
Q2(c): Israel — Paid Tier & Banking	Bank of Israel Procedure 411; Consumer Protection Law §§ 13D, 14C	**Medium**	Register as *Osek Patur* / *Osek Mursheh*; onboard with Merchant of Record (Paddle) as EdTech software; use `"Supporter Tier"`, never `"Donation"`.
Q3: Russia, EU, and United States	Russia 149-FZ Art. 15.1; EU ePrivacy Art. 5(3); US UIGEA 31 U.S.C. § 5362	**Med-High (RU) / Low-Med (EU/US)**	Zero poker-site affiliate links (avoids RU block); rely on ePrivacy Art. 5(3) local-storage exemption in EU; remove `"banker"` term for US compliance.
Q4: Online Poker RTA & Prohibited Tools	PokerStars Prohibited Tools Policy; GGPoker Security & Ecology Policy	**High (if "Live") / Low (if Study)**	Rename `"Live Decision"` to **"Quick Spot Lookup"**; add off-table click-through gate; add optional desktop process-detection self-lock.
Q5: Mandatory Documents & Solver Licences	Israel PPL § 11 & Amendment 13; IS 5568 Reg. 35; EU EAA Art. 4(5)	**Medium**	Publish Section 11 / GDPR Privacy Policy, ToS, OSS Notices, and Accessibility Exemption Statement; run `b-inary/postflop-solver` strictly offline.
Q6: Age Restrictions (18+ / 21+)	Apple Regional Age Ratings; Google Play Content Ratings; Israel Penal Law § 231A	**Medium**	Mandate **18+ globally (21+ where required)** in ToS and store Target Audience; rate 17+/18+ on stores; exclude South Korea unless GRAC-certified.

1. Question 1: Apple App Store and Google Play Store Rules for Poker Study and Gambling-Adjacent Apps

Assessed Risk Level: Medium for the core poker study workstation; **High** if the "Game Night" organiser displays monetary debt/banker settlement flows or if "Live Decision" mode is presented as an in-game aid `[Judgement]`.

Mobile application marketplaces enforce stricter and more automated rules on poker-related software than open web or desktop platforms. Even when an application processes zero real-money wagers and sells no virtual chips, automated keyword scanners and human reviewers evaluate any app containing playing cards, poker hand notation (`BTN`, `BB`, `3-bet`, `EV`), or pot calculations under their gambling and simulated-gambling frameworks.

1.1 Apple App Store Review Guidelines Analysis

Apple governs gambling, simulated gambling, in-app monetization, and user safety under the Apple App Store Review Guidelines. Five specific guidelines directly affect Riverline's architecture and metadata:

1. **Guideline 5.3 — Gaming, Gambling, and Lotteries (Real-Money vs. Gambling Aids):**
   In the introductory preamble to Section 5.3 and its sub-clauses, Apple establishes a high-scrutiny review threshold and an explicit prohibition on unlawful gambling aids (Apple App Store Review Guidelines; Royal Gambit Analysis of Apple Guideline 5.3):

   > *"Gaming, gambling, and lotteries can be tricky to manage and tend to be one of the most regulated offerings on the App Store. Only include this functionality if you've fully vetted your legal obligations everywhere you make your app available and are prepared for extra time during the review process."*
   > *"Illegal gambling aids, including card counters, are not permitted on the App Store."*

[Judgement] While Guideline 5.3.4 (requiring state gambling licenses, geo-fencing, free download, and banning In-App Purchases for wagering credits) applies only to apps offering *real-money gaming*, the sentence **"Illegal gambling aids, including card counters, are not permitted on the App Store"** is the primary trigger that causes poorly framed poker calculators or "live decision" helpers to be rejected. If an App Review specialist sees a mode labeled **"Live Decision"** or marketing copy implying that a user can consult Riverline during a live casino or online poker hand, Apple will reject the binary under Guideline 5.3 as an impermissible gambling aid. Conversely, when an app is clearly framed as an **offline/post-session mathematical training, hand-history review, and strategy study workstation**, it falls outside the ban on illegal gambling aids.

2. **Simulated Gambling Classification and Global/Regional Age Ratings (Guideline 2.3.6):**
   Under Guideline 2.3.6, developers must answer the App Store Connect age-rating questionnaire accurately:

   > *"2.3.6 ASR & NR Answer the age rating questions in App Store Connect honestly so that your app aligns properly with parental controls. If your app is mis-rated, customers might be surprised by what they get, or it could trigger an inquiry from government regulators."*

Apple's age-rating questionnaire asks whether the app contains **Simulated Gambling** (*None*, *Infrequent/Mild*, or *Frequent/Intense*). Because Riverline's training loop connects *"reconstructing or playing hands, replay and review, analysis, the player's own intended strategy, training drills and learning"* (`RIVERLINE_BRIEF.md` § 1), any interactive drill where a user acts on a simulated poker table with virtual bet sizes in big blinds (`bb`) or chips will be treated by Apple Reviewers as **Simulated Gambling** `[Judgement]`. Under Apple's global policy (MacRumors Verbatim Developer Notice):

> *"And to ensure that our global age rating system continues to help make the App Store safe for kids, apps that feature Frequent/Intense Simulated Gambling will be rated 17+ in all countries and regions starting August 20, 2019."*

Furthermore, Apple enforces statutory regional age ratings on top of the global rating (Apple Developer News: Upcoming Regional Age Ratings in Australia and France):

> *"Australia: Apps with any instances of simulated gambling will display an R18+ regional age rating in addition to the Apple global age rating on the App Store in Australia."*
> *"France: Apps with a 17+ Apple global age rating will also display an 18+ regional age rating on the App Store in France."*

In the **Republic of Korea**, Apple requires a government pre-classification number from the Game Rating and Administration Committee (GRAC) for any app rated 17+ in the Casino subcategory or selecting *Frequent/Intense Simulated Gambling* in Games or Entertainment (MacRumors Verbatim Developer Notice). **[Judgement]** Because obtaining a Korean GRAC certificate requires a local Korean entity or paid representative, Riverline should deselect South Korea in App Store Connect storefront availability upon initial iOS launch.

3. **Guideline 2.3.8 — Storefront Metadata Must Adhere to a 4+ Rating:**
   Even when an app is rated 17+ or 18+, its public storefront assets must meet a 4+ standard (Apple App Store Review Guidelines):

   > *"2.3.8 ASR & NR Metadata should be appropriate for all audiences, so make sure your app and in-app purchase icons, screenshots, and previews adhere to a 4+ age rating even if your app is rated higher."*

[Judgement] Riverline's planned visual direction (`RIVERLINE_BRIEF.md` § 4)—dark forest/jade/brass data panels, probability tiles, and the calm teacher-like mascot Chippy—is naturally well-suited to Guideline 2.3.8, provided screenshots show probability matrices, range grids, and pot-odds math rather than stacks of cash, currency symbols, or casino betting rhetoric.

4. **Guideline 1.4.5 — Urging Participation in Bets:**
   Under Guideline 1.4.5:

   > *"1.4.5 ASR & NR Apps should not urge customers to participate in activities (like bets, challenges, etc.) or use their devices in a way that risks physical harm to themselves or others."*

5. **Guideline 3.1.1 — In-App Purchases, Subscriptions, and Creator Tips:**
   When Riverline introduces an optional paid tier (subscriptions, supporter tier, or tips/donations) on iOS, Guideline 3.1.1 strictly requires using Apple's In-App Purchase (IAP) API:

   > *"3.1.1 In-App Purchase: If you want to unlock features or functionality within your app, (by way of example: subscriptions, in-game currencies, game levels, access to premium content, or unlocking a full version), you must use in-app purchase."*
   > *"Apps may use in-app purchase currencies to enable customers to 'tip' the developer or digital content providers in the app."*

[Judgement] On iOS, Riverline cannot include a Stripe, Paddle, Patreon, or PayPal link/button inside the app for subscriptions or supporter tips (unless utilizing region-specific external link entitlements in the EU/US, which carry their own complex reporting and commission fees). Instead, any in-app upgrade or supporter tip must use StoreKit In-App Purchases (where an independent developer qualifies for the 15% App Store Small Business Program commission rate on the first $1 million of annual revenue), or the iOS app must operate as a "reader/companion" login without in-app upgrade links.

1.2 Google Play Store Developer Program Policies Analysis

Google Play regulates poker study and simulated-gambling applications under two core policy frameworks:

1. **Real-Money Gambling, Games, and Contests Policy & Simulated Gambling Rules:**
   Under Google Play's Real-Money Gambling, Games, and Contests Policy, Google generally prohibits unapproved real-money gambling apps and imposes strict boundaries on simulated gambling:

   > *"While Google Play generally prohibits apps from facilitating real-money gambling and gaming, an exception is made for apps that meet specific requirements..."*

> *"App must not provide simulated gambling content (for example, social casino apps; apps with virtual slot machines) [if distributed to underage target audiences or linked to real-money value]."*

Apps on Google Play that include simulated card-game wagering or social casino mechanics must never allow virtual chips or points to be cashed out or transferred for real-world value, must not promote or direct users to external real-money gambling sites, and routinely include the industry-standard store listing disclosure (Google Play Store Listings):

> *"Practice or success at social casino gaming does not imply future success at real money gambling."*

2. **Content Ratings (IARC) and Target Audience Policy:**
   Under Google Play's Content Rating Requirements and Target Audience Policy, developers complete the International Age Rating Coalition (IARC) questionnaire in Play Console. Importantly, IARC distinguishes between: * **Simulated Gambling** (where the user plays a gambling game with virtual currency/chips), which automatically assigns **PEGI 18** in Europe, **R18+** in Australia, and **Teen / Mature 17+** in North America; and * **Educational / Instructional Gambling Content** (apps that teach probabilities, rules, or strategy without interactive wagering).
   Regardless of which IARC branch applies, in Play Console's **Target Audience and Content** section, any app referencing poker or gambling must select **18 and over only** as its target age group; selecting any under-18 target bracket triggers immediate policy rejection.

1.3 Rules Specific to Recording Money Owed Between Friends ("Game Night" Organiser)

[Judgement] Standalone expense-splitting apps (such as Splitwise or Settle Up) are permitted on both the Apple App Store and Google Play under the *Finance* or *Utilities* category because they are general-purpose household expense calculators. However, **combining a poker app with a financial ledger that tracks "buy-ins", "rebuys", "cash-outs", and "settle-up transfers (fewest transfers or via a banker)" creates a severe cross-category rejection trap on both stores**:

- **Misclassification as Unlicensed Real-Money Gambling Facilitation:** Automated store scanners and human reviewers look for the combination of poker gameplay/tools + real-money balances (`$`, `₪`, `€`) + settlement instructions (`"Person A pays Person B $150"` or `"Pay Banker"`). Even though Riverline moves no money and processes no payments, reviewers frequently reject poker-branded cash ledgers under Apple Guideline 5.3.4 or Google Play's Real-Money Gambling Policy on the ground that the app "facilitates" unlicensed real-money poker games or manages wagering pools.
- **How to Pass App Review Safely (`[Judgement]`):** 1. Ship the **Points / Chips-Only Mode** as the default and only store-visible representation of the "Game Night" organiser on iOS and Android, or frame the module strictly as a **Session Chip & Score Reconciler** using unitless integers (`Points` or `Chips`). 2. Never display currency symbols (`$`, `₪`, `€`, `₽`), Venmo/Bit/PayBox deep links, or the word `"Banker"` anywhere in the UI or store screenshots. 3. Include an explicit explanation in the **App Review Notes** (Apple Guideline 2.3.1(a)) stating: *"Riverline is an offline mathematical probability and strategy study tool for Texas Hold'em. It contains no real-money gaming, no in-app virtual currency for sale, no payouts, and no payment processing. The Game Night tool is a local calculator that reconciles unitless point/chip scores from friendly offline study sessions."*

Feature / Context	High-Risk Wording to Avoid (Triggers Store / Bank / RTA Flags)	Recommended Safe Wording (`[Judgement]`)
App Title / Subtitle	"Live Poker Assistant", "Real-Time Poker Solver", "Cash Game Helper & Bankroll Manager"	"Riverline: Poker Study & Math Workstation", "Off-Table Hand Review & Strategy Trainer"

Feature / Context	High-Risk Wording to Avoid (Triggers Store / Bank / RTA Flags)	Recommended Safe Wording (`[Judgement]`)
"Live Decision" Mode	"Live Decision Mode", "In-Game Helper", "Table Assistant", "Real-Time Spot Solver"	"Quick Spot Lookup", "Fast Hand Reconstructor", "Off-Table Spot Checker"
Game Night Module Name	"Home Cash Game Manager", "Poker Debt Tracker", "Banker & Buy-In Ledger"	"Game Night Score & Chip Log", "Session Stack Reconciler", "Friendly Points Organiser"
Game Night Inputs	"Buy-in ($ / ₪)", "Rebuy ($)", "Cash-out ($)", "Money Owed", "Rake / House Fee"	"Initial Stack / Allocation (pts)", "Reload (pts)", "Final Stack Count (pts)", "Net Score Delta"
Game Night Settlement	"Settle Up Debts", "Pay via Banker", "Who Owes Whom", "Send via Bit / PayBox / Venmo"	"Minimum-Transfer Stack Reconciliation", "Coordinator Summary", "Point Balancing Table"
Paid Tier / Monetization	"Donate to Riverline (תרומה)", "Buy Chips / Credits", "Win More Money with Pro"	"Riverline Supporter Tier", "Pro Study Subscription", "Creator Tip (via Store IAP / MoR)"

2. Question 2: Israel — Legality and Risk Analysis of the Study Tool, Home-Game Tracker, and Paid Tier

Assessed Risk Level: (a) Poker Study Tool: Low Risk; **(b) Home-Game Money Tracker: High Risk** (if framed around monetary buy-ins and cash settlements) / **Low Risk** (if Points/Chips-Only Mode); **(c) Paid Tier: Medium Risk** (governed by banking, tax, consumer-protection, and privacy statutes rather than criminal gambling law) `[Judgement]`.

Because the developer is based in Israel (Rishon LeZion / Haifa), Israeli law applies directly to the developer's personal and commercial activities regardless of where users are located.

2.1 The Israeli Statutory and Case-Law Framework on Poker

Gambling in Israel is governed by Chapter 12, Article 12 of the Israeli Penal Law, 5737-1977 (חוק העונשין, תשל"ז-1977, פרק ח', סימן י"ב: משחקים אסורים, הגרלות והימורים, Sections 224–235). The statute establishes a broad criminal prohibition on organizing, conducting, or participating in a "prohibited game", lottery, or bet, subject only to state-licensed monopolies (Mifal HaPais and the Israel Sports Betting Board / Toto Winner under Section 231) and a narrow social exemption under Section 230 (Chambers Gaming Law 2025 – Israel, authored by Herzog Fox & Neeman).

The exact statutory definitions and offenses in Sections 224–228 of the Israeli Penal Law read as follows:

> ***סעיף 224 (הגדרות):***
> *"משחק אסור" - משחק שבו עשוי אדם לזכות בכסף, בשווה כסף, או בטובת הנאה לפי תוצאות המשחק, והתוצאות תלויות בגורל יותר מאשר בהבנה או ביכולת;*
> *"מקום משחקים אסורים" - חצרים שרגילים לערוך בהם משחקים אסורים, בין שהם פתוחים לציבור ובין שהם פתוחים לבני אדם מסויימים בלבד, ואין נפקא מינה אם הם מוחזקים גם למטרה אחרת;*
> *(Translation: "Prohibited game" — a game in which a person may win money, money's worth, or a benefit according to the results of the game, and the results depend more on chance than on understanding or ability; "Place of prohibited games" — premises where prohibited games are habitually conducted, whether open to the public or open only to specific persons, regardless of whether they are also maintained for another purpose.)*

סעיף 225 (איסור הגרלות והימורים):

המארגן או עורך משחק אסור, הגרלה או הימור, דינו - מאסר שלוש שנים...

(Translation: One who organizes or conducts a prohibited game, lottery, or bet is liable to three years' imprisonment [or a fine up to ILS 452,000 per Chambers Gaming Law 2025].)

סעיף 226 (איסור משחקים):

המשחק משחק אסור, דינו - מאסר שנה אחת או הקנס האמור בסעיף 61(א)(2).

(Translation: One who plays a prohibited game is liable to one year's imprisonment or a fine [up to ILS 29,200].)

סעיף 228 (איסור החזקה או הנהלה):

המחזיק או מנהל מקום משחקים אסורים, או מקום לעריכת הגרלות או הימורים... דינו - מאסר שלוש שנים או כפל הקנס האמור בסעיף 61(א)(4)...

(Translation: One who holds or manages a place of prohibited games... is liable to three years' imprisonment or double the fine.)

How Israeli Courts Classify Texas Hold'em:

Historically, Israeli criminal courts have consistently ruled that Texas Hold'em played for money or prizes fails the statutory "predominance test" (תלויות בגורל יותר מאשר בהבנה או ביכולת) and therefore constitutes a **"prohibited game" (משחק אסור)** under Section 224 (Chambers Gaming Law 2025 – Israel). For example, in *Criminal Case (Tel Aviv) 34939-07-15 State of Israel v. Nir Lashowitz et al.* (2017), the court evaluated the predominance of chance versus skill from the perspective of an amateur playing a single hand, and in *Class Action (Tel Aviv) 30284-01-10 Simon Davush v. Connective Group Ltd.* (2011), the Tel Aviv District Court held that courts must also weigh "social interest and utility" when a game combines skill and chance (Chambers Gaming Law 2025 – Israel).

In late 2018, the Supreme Court of Israel issued a landmark tax judgment in *Civil Appeal 476/17 Amit Amishvili Rafi (Rafiach) v. Assessing Officer Tel Aviv 4*, addressing whether a professional tournament poker player's overseas winnings were taxable as income from a profession/vocation. As summarized by Herzog Fox & Neeman in Chambers Gaming Law 2025 – Israel:

> *"In its ruling, the court's majority opinion was that poker is not in fact a game of chance, in particular when dealing with an experienced player who successfully generates consistent revenues in poker tournaments over the years. The court had also passed criticism on the legal validity of prior, lower-court rulings that held that in assessing the game of poker, the 'predominance test' should be applied to the game in relation to an amateur player playing a single hand. Nonetheless, owing to this opinion being made only in obiter dictum, it did not form a binding legal precedent."*

Consequently, under binding Israeli criminal law in 2026, playing or organizing poker for money or any prize remains a criminal offense under Sections 225–226 unless exempted by Section 230 of the Penal Law (Ashash Criminal Law Guide; Poker Academy Israel).

2.2 Sub-Analysis (a): Legality and Risk of a Poker Study Tool in Israel (Low Risk)

[Judgement] Developing, distributing, and using Riverline as a **poker study tool** (hand reconstruction, replay, equity calculation, personal strategy charts, and training drills without prizes or wagering) is **completely lawful in Israel and carries Low Risk**.

1. **Statutory Absence of the Prize/Benefit Element:** Under Section 224 of the Penal Law, a game is only a "משחק אסור" if a person *"may win money, money's worth, or a benefit according to the results of the game"* (עשוי אדם לזכות בכסף, בשווה כסף, או בטובת הנאה לפי תוצאות המשחק). Where no money, money's worth, or redeemable benefit is at stake—even in interactive training drills—the statutory definition is not met.
2. **Explicit Confirmation in Israeli Legal Practice:** As stated in Israeli criminal defense commentary on Section 224 (Ashash Criminal Law Guide):

"אז מה כן מותר? לימוד פוקר בתשלום – מותר. משחקי תרגול ללא פרסים – מותר."
(Translation: "So what is permitted? Paid poker instruction — permitted. Practice games without prizes — permitted.")

3. **Warning on "Points" That Unlock Prizes:** Israeli courts interpret "טובת הנאה" (benefit) broadly: even virtual points that grant free entry into additional prize-bearing games or tournaments have been held to constitute a prohibited "benefit" (Ashash Criminal Law Guide). **[Judgement]** Therefore, Riverline's planned achievements and Orbit sessions (`RIVERLINE_BRIEF.md` § 6) must remain purely cosmetic/educational progress indicators and must **never** award freeroll entries, subscription discounts, or monetary prizes based on winning simulated hands.

2.3 Sub-Analysis (b): Legality and Risk of the Home-Game Money Tracker in Israel (High Risk if Cash-Based / Low Risk if Points-Only)

[Judgement] The "Game Night" organiser—if deployed as a tool that *"records buy-ins, rebuys and cash-outs between friends in a private home game and suggests settle-up transfers (fewest transfers or via a banker)"*—is the highest statutory risk in Israel and requires careful legal and architectural insulation.

Why Home Cash Games in Israel Walk a Razor-Thin Legal Line:
Many Israeli players assume that any home game among friends in a private living room is automatically legal under the social exemption in Section 230 of the Penal Law, which provides:

> ***סעיף 230 (נסיבות מיוחדות):***
> *230. הוראות סעיפים 225 עד 228 לא יחולו על משחק, הגרלה או הימור שנתמלאו בהם שלוש אלה:*
> *(1) עריכתם מכוונת לחוג אנשים מסויים;*
> *(2) אינם חורגים מגדר שעשוע או בידור;*
> *(3) אינם נערכים במקום משחקים אסורים או במקום לעריכת הגרלות או הימורים.*
> *(Translation: The provisions of Sections 225 to 228 shall not apply to a game, lottery, or bet in which all three of the following are fulfilled: (1) their conduct is intended for a particular circle of persons; (2) they do not exceed the scope of amusement or entertainment; (3) they are not held in a place of prohibited games or a place for the conduct of lotteries or betting.)*

However, Israeli courts construe Section 230 very narrowly (*CrimA 9140/99 Amos Romano v. State of Israel*, cited in Chambers Gaming Law 2025 – Israel), and the Penal Law contains two severe statutory traps in Sections 233 and 235 that most casual players do not know exist:

1. **The "Two Games in Six Months" Statutory Presumption (Section 233(3)(a)):**
   Look at the exact wording of Section 233(3)(a) of the Penal Law:

   > *233. (3) רואים חצרים כמקום שרגילים לערוך בהם משחקים אסורים - (א) אם נערך בהם משחק אסור לפחות שתי פעמים תוך ששה חדשים שקדמו לביצוע העבירה בידי הנאשם, כל עוד לא הוכח ההיפך...*
   > *(Translation: Premises are presumed to be a place where prohibited games are habitually conducted — (a) if a prohibited game was conducted therein at least two times within the six months preceding the commission of the offense by the defendant, unless the opposite is proven.)*

[Judgement] If a home cash game fails Condition (1) (e.g., friends-of-friends are invited via WhatsApp/Telegram) or Condition (2) (e.g., buy-ins and rebuys reach hundreds or thousands of shekels, which courts find exceeds "mere amusement or entertainment"), and the game is hosted in the same apartment twice within six months, Section 233(3)(a) creates a statutory presumption that the apartment is a "מקום משחקים אסורים", destroying Condition (3) of Section 230 as well! 2. **Aiding/Organizing Liability and Police Seizure of Instruments (Section 225, Section 31, and Section 235):**
Under Section 235(a) of the Penal Law:

> *235. (א) היה לשוטר יסוד סביר להניח כי כלים או מכשירים, כרטיסים או כל דבר אחר שימשו לארגונם או לעריכתם של משחק, הגרלה או הימור אסורים, רשאי הוא לתפסם...*
> *(Translation: If a police officer has reasonable grounds to believe that tools, devices, tickets, or any other thing were used for the organization or conduct of a prohibited game, lottery, or bet, he may seize them...)*

If an organizer of an unlawful Israeli cash game (or commercial home game taking rake) uses Riverline's "Game Night" organiser to log NIS buy-ins, rebuys, cash-outs, and "banker" transfers, those app logs are direct documentary evidence of a Section 225 offense. If Riverline were to host or sync those cash-game ledgers on a cloud server, or market the feature in Hebrew as a tool for managing cash home games and settling gambling debts (חובות פוקר / קאש גיים), the developer risks scrutiny for facilitating or aiding the organization of prohibited games (סיוע לארגון משחק אסור under Section 31 + Section 225) `[Judgement]`. 3. **Civil Unenforceability of Gambling Debts (Contracts Law § 32(a)):**
Under Section 32(a) of the Israeli Contracts Law (General Part), 5733-1973 (חוק החוזים (חלק כללי), תשל"ג-1973), a contract for an unregulated game, lottery, or bet (חוזה של משחק, הגרלה או הימור) gives rise to no right of criminal or civil enforcement for the recovery of winnings. Suggesting "settle-up transfers" framed as legally owed monetary debts is legally inaccurate under Israeli civil law.

How to Design the "Game Night" Organiser Safely in Israel (`[Judgement]`): * **Make Points / Chips-Only Mode the Default and Only Branded Mode:** In the project prompt, the owner notes: *"Points/chips-only mode is planned too."* Elevate Points/Chips-Only Mode to be the **core identity** of the Game Night module (`"Game Night Chip & Score Log"`). All inputs should be unitless integers (`Points`, `Chips`, or `BB`) with **zero currency symbols**. * **Remove the Word "Banker" (קופה / בנקאי):** Replace `"via a banker"` with **"Hub / Coordinator Mode"** (איחוד דרך מרכז טבלה) for point reconciliation. * **Prohibit Rake / Fee Calculations:** Never allow users to input a house percentage, rake, or dealer/host fee. * **Zero Cloud Persistence for Game Night:** Keep Game Night reconciliation strictly client-side in `localStorage` with an instant "Clear Session" button; never store third-party players' names, phone numbers, or financial balances in Riverline's backend database.

2.4 Sub-Analysis (c): Legality and Risk of the Paid Tier in Israel (Medium Risk)

[Judgement] Charging users in Israel and worldwide for a **paid poker study tier** (subscriptions, supporter tier, coaching/analysis services) is **lawful under the Israeli Penal Law** ("לימוד פוקר בתשלום – מותר", Ashash Criminal Law Guide), provided the payment solely unlocks educational software features or study content and never buys virtual chips used to wager for prizes. However, launching a paid tier in Israel triggers **four mandatory non-gambling legal and financial regimes**:

1. **Bank of Israel Procedure No. 411 (Gambling Transaction Blocks):**
   As documented by Herzog Fox & Neeman (Chambers Gaming Law 2025 – Israel):

   > *"The Bank of Israel has issued a formal procedure in order to thwart financial transactions relating to unlicensed gambling (Conduct of Banking Business Procedure No 411). The procedure imposes stringent restrictions on Israeli financial and credit institutions regarding transactions related, among others, to online gambling. ... As gambling-related offences are considered 'source offences' under the Prevention of Money Laundering Law 5760-2000, any unlawful gambling activity may also establish a money-laundering offence and be prosecuted as such."*

[Judgement] Because Israeli banks (Leumi, Hapoalim, Discount, Mizrahi-Tefahot) and credit card acquirers (Isracard, Cal, Max) enforce Procedure No. 411 aggressively via automated keyword compliance, a merchant account or wire transfer bearing the descriptor `"Riverline Poker"` or `"Poker App"` can be frozen pending compliance review. When opening a business bank account or onboarding with a payment processor (or Merchant of Record such as Paddle), the business activity must be described accurately and formally as **"Educational Software & Game-Theory / Probability Training Tools (SaaS)"**, accompanied by a clear website banner stating: *"Educational study software only. No gambling, no real-money play, no wagering."* 2. **Tax & Business Registration (*Osek Patur* / *Osek Murshe*) and the Danger of Calling Payments "Donations" (תרומות):**

In Israel, any recurring or occasional revenue from subscriptions, services, or "supporter" contributions is taxable business income under the Income Tax Ordinance (פקודת מס הכנסה) and Value Added Tax Law (חוק מס ערך מוסף). Before accepting a single shekel or dollar, the developer must register as at least an **Osek Patur** (עוסק פטור, exempt dealer for annual turnover up to approximately NIS 120,000) or **Osek Murshe** (עוסק מורשה) with VAT, Income Tax, and National Insurance (ביטוח לאומי), and issue statutory digital receipts (חשבונית מס קבלה / קבלה). **[Judgement] Never use the Hebrew word "תרומה" (Donation) or English "Donation"** for supporter payments unless registered as a non-profit association (עמותה) holding a Section 46 tax-deductibility approval. In Israeli tax and consumer law, soliciting "donations" as a private individual or for-profit business creates tax-audit friction and potential misrepresentation claims; always use **"Supporter Tier" (מסלול תומכים)**, **"Creator Tip" (טיפ ליוצר)**, or **"Pro Membership" (מנוי פרו)**. 3. **Israeli Consumer Protection Law (חוק הגנת הצרכן, התשמ"א-1981) for Subscriptions:**
Once Riverline sells subscriptions to Israeli users, it is governed by Section 14C (Remote Marketing Transaction / עסקת מכר מרחוק) and Section 13D / Section 14I (Continuous Transaction / עסקה מתמשכת) of the Consumer Protection Law (detailed fully in Section 5 below).

---

3. Question 3: Russia, European Union, and United States — High-Level Risk Analysis

Assessed Risk Level: Russian Federation: Medium-to-High Risk (extra-judicial domain blocking and data localization); **European Union: Low-to-Medium Risk** (lawful study tool; strict GDPR/ePrivacy/Consumer rules); **United States: Low-to-Medium Risk** (lawful study tool under First Amendment and UIGEA; state-level home-game and "banker" terminology risks) `[Judgement]`.

3.1 Russian Federation (RU Localization & User Base)

Because Riverline supports Russian (`RU`) as one of its three primary languages (`RIVERLINE_BRIEF.md` § 1), Russian-speaking users inside and outside the Russian Federation will access the application. Operating a poker-related web or mobile application accessible in the Russian Federation involves three distinct statutory hazards:

1. **Extra-Judicial Domain Blocking within 24 Hours (Federal Law No. 149-FZ Art. 15.1 & Federal Law No. 244-FZ):**
   Under Article 15.1(5)(1)(d) of Federal Law No. 149-FZ of July 27, 2006 "On Information, Information Technologies and Protection of Information", Roskomnadzor (`Роскомнадзор`), acting on referrals from the Federal Tax Service (`ФНС России`) and the Unified Gambling Regulator (`ЕРАИ`), maintains the Unified Register of Prohibited Websites (`Единый реестр запрещенной информации`). The official Roskomnadzor statutory notice quotes the exact extra-judicial blocking ground:

   > *«Частью 5 статьи 15.1 Федерального закона № 149-ФЗ предусмотрены следующие основания включения сведений в единый реестр во внесудебном порядке: 1) решения уполномоченных Правительством Российской Федерации федеральных органов исполнительной власти... в отношении распространяемых посредством сети «Интернет»: ... д) информации, нарушающей требования Федерального закона от 29 декабря 2006 года N 244-ФЗ "О государственном регулировании деятельности по организации и проведению азартных игр..." о запрете деятельности по организации и проведению азартных игр и лотерей с использованием сети "Интернет" и иных средств связи... После поступления в уполномоченный орган обращения граждан о наличии на страницах сайтов в сети «Интернет» запрещенной информации, в течении суток принимается решение о включении интернет-сайта в единый реестр.»*
   > *(Translation: Part 5 of Article 15.1 of Federal Law No. 149-FZ provides the following grounds for inclusion of information in the unified register on an extra-judicial basis: 1) decisions of authorized federal executive bodies... regarding information distributed via the Internet: ... (d) information violating the*

requirements of Federal Law No. 244-FZ of December 29, 2006 "On State Regulation of Activities in Organizing and Conducting Gambling..." on the prohibition of organizing and conducting gambling and lotteries using the Internet and other means of communication... Within 24 hours of receipt, a decision is made to include the website in the unified register.)

[Judgement] While pure mathematical and educational poker strategy text does not violate Federal Law No. 244-FZ in theory, in practice the FNS and Roskomnadzor routinely block Russian-language poker training websites **without a court order** if the site contains any outbound link, logo, review, promo code, or reference to an online poker room (such as PokerStars or GGPoker), or if a "Game Night" money tracker is interpreted by a censor as organizing unlicensed online/offline poker games. To minimize blocking risk in Russia, Riverline must contain **zero outbound links, logos, or promotional references to any poker room**, and must display a prominent Russian-language header/footer notice stating that it is a purely mathematical game-theory trainer with no gambling functionality.

2. **Personal Data Localization (Federal Law No. 152-FZ "On Personal Data" Art. 18(5)):**
   Under Article 18(5) of Russian Federal Law No. 152-FZ and Article 15.5 of Federal Law No. 149-FZ, any operator collecting personal data of Russian citizens on a website "directed at" the Russian Federation (evidenced by a Russian-language interface combined with Russian payment methods or `.ru` marketing) must record and store that personal data on databases physically located within the Russian Federation. Violating Article 18(5) leads to administrative fines and domain blocking by Roskomnadzor under Article 15.5 of 149-FZ. **[Judgement]** So long as Riverline is **local-first without accounts**, zero personal data is collected. When optional Supabase accounts are added later, Riverline should host on a single global `.com`/`.app` domain, state in its Terms of Service that the Russian interface is provided for Russian-speaking users globally (such as in Israel, Europe, and North America) rather than targeting the territory of the Russian Federation, and collect only a minimal pseudonymous email/password.

3. **Sanctions and Payment Processing Isolation:**
   International payment processors (Stripe, Paddle, Lemon Squeezy, PayPal, Apple App Store, Google Play) block cards issued by Russian banks (`Mir`, Russian Visa/Mastercard) and prohibit payouts to sanctioned Russian financial institutions. **[Judgement]** An Israeli developer must **never** integrate Russian gray-market payment aggregators or crypto/P2P ruble gateways to monetize users inside Russia, as doing so creates severe sanctions and anti-money-laundering (AML) compliance exposure with Israeli banks.

3.2 European Union (EU)

1. **Gambling Law Competence (Low Risk):**
   There is no EU-wide harmonization of gambling law; each EU Member State regulates games of chance under national law subject to Treaty on the Functioning of the European Union (TFEU) principles. Across all 27 EU Member States, gambling statutes require three cumulative elements: **consideration (a stake/wager), chance, and a prize of value**. A poker study workstation and local score calculator with zero stakes and zero prizes is lawful across the entire EU `[Judgement]`.
2. **GDPR & ePrivacy Directive Local-Storage Exemption (Medium Risk — Manageable by Design):**
   Under the **EU General Data Protection Regulation (GDPR, Regulation (EU) 2016/679)** Art. 3(2), offering a free or paid app to users in the EU triggers GDPR transparency and data-subject rights once personal data (such as account emails or IP logs) is processed. Crucially, however, for Riverline's local-first storage (`localStorage` and `IndexedDB`) with **no analytics**, Article 5(3) of the EU ePrivacy Directive (Directive 2002/58/EC) provides an explicit statutory exemption from cookie/storage consent banners:

   *"3. Member States shall ensure that the use of electronic communications networks to store information or to gain access to information stored in the terminal equipment of a subscriber or user is only allowed on condition that the subscriber or user concerned is provided with clear and comprehensive information in accordance with Directive 95/46/EC, inter alia about the purposes of the processing, and is offered the right to refuse such processing by the data controller. **This shall not prevent any technical***

> ***storage or access for the sole purpose of carrying out or facilitating the transmission of a communication over an electronic communications network, or as strictly necessary in order to provide an information society service explicitly requested by the subscriber or user.***"

[Judgement] Because storing a user's hand reconstructions, personal strategy ranges, language preference, and motion settings in `localStorage`/`IndexedDB` is *"strictly necessary in order to provide an information society service explicitly requested by the subscriber or user"*, and Riverline uses **zero analytics or advertising trackers**, Riverline does **not** need an intrusive GDPR/ePrivacy cookie consent pop-up banner! A transparent informational **Local Storage Notice** in the Privacy Policy and Settings screen fully satisfies EU law. 3. **European Accessibility Act Microenterprise Exemption (Directive (EU) 2019/882):**
While the European Accessibility Act (EAA) took effect on June 28, 2025 for e-commerce services across the EU, Article 4(5) of Directive (EU) 2019/882 explicitly exempts microenterprises (fewer than 10 employees and annual turnover or balance sheet under EUR 2 million):

> *"5. Microenterprises providing services shall be exempt from complying with the accessibility requirements referred to in paragraph 3 of this Article and any obligations relating to the compliance with those requirements.*"

3.3 United States (US)

1. **Federal Gambling Statutes and First Amendment Protection (Low Risk for Study App):**
   At the US federal level, internet gambling is governed primarily by the **Unlawful Internet Gambling Enforcement Act of 2006 (UIGEA)** (31 U.S.C. §§ 5361–5367; implemented by 12 CFR Part 233 / Regulation GG), the **Federal Wire Act** (18 U.S.C. § 1084, which the First Circuit and US courts have held applies only to sports betting), and the **Illegal Gambling Business Act** (18 U.S.C. § 1955). Under 31 U.S.C. § 5362(1) and (10) and 12 CFR § 233.2:

   > *"(c) Bet or wager: (1) Means the staking or risking by any person of something of value upon the outcome of a contest of others, a sporting event, or a game subject to chance, upon an agreement or understanding that the person or another person will receive something of value in the event of a certain outcome..."*
   > *"(bb) Unlawful Internet gambling means to place, receive, or otherwise knowingly transmit a bet or wager by any means which involves the use, at least in part, of the Internet where such bet or wager is unlawful under any applicable Federal or State law..."*

[Judgement] Because Riverline never places, receives, or transmits a "bet or wager" and stakes nothing of value, it is completely outside UIGEA, the Wire Act, and 18 U.S.C. § 1955. Furthermore, under US constitutional law, poker mathematics, game-theory algorithms, and strategy instruction are protected speech under the First Amendment. 2. **FinCEN Money Transmission Exemption (Low Risk if Pure Calculator):**
Under US Financial Crimes Enforcement Network (FinCEN) regulations (31 CFR § 1010.100(ff)), a "money transmitter" is a person that provides "money transmission services" (the acceptance of currency, funds, or other value that substitutes for currency from one person and the transmission of currency, funds, or other value to another location or person). Because Riverline's Game Night organiser moves no money and processes no payments, it is not a Money Services Business (MSB) `[Judgement]`. 3. **State-Level Home-Game Laws and the "Banker" Terminology Trap (Medium Risk):**
Gambling in the US is regulated primarily at the state level. While roughly half of US states have statutory "social gambling" exemptions for rake-free home games, several states—such as **Utah** (Utah Code § 76-10-1102, banning all gambling strictly) and **Washington State** (RCW 9.46.240)—maintain strict anti-gambling laws. Even more importantly, in states like **California** (California Penal Code § 330), social poker is lawful *only* if the game is not a **"banked" or "percentage" game** (a game where one participant or house acts as the "banker" taking on all bets or settling payouts centrally). **[Judgement]** Describing Riverline's Game Night settle-up algorithm as settling **"via a banker"** uses a specific criminal statutory trigger term in the United States. Replacing `"via a`

`banker"` with **"Single-Coordinator Point Reconciliation"** or **"Hub-and-Spoke Transfer Minimization"** eliminates this linguistic hazard.

Jurisdiction	Study Workstation Risk	Home-Game Tracker Risk	Paid Tier Risk	Primary Statutory & Regulatory Triggers
Israel (IL)	**Low**	**High** (if cash/debt) / **Low** (if points)	**Medium**	Penal Law §§ 224–235; Bank of Israel Proc. 411; Privacy Law Amend. 13; Consumer Protection Law §§ 13D, 14C.
Russian Federation (RU)	**Medium-High** (Web Blocking)	**High** (FNS/RKN Blocking)	**High** (Sanctions / 152-FZ)	Federal Law 149-FZ Art. 15.1 & 15.5; Federal Law 244-FZ; Federal Law 152-FZ Art. 18(5) (Data Localization).
European Union (EU)	**Low**	**Low-Medium** (GDPR if synced)	**Medium** (VAT OSS / CRD)	GDPR (Reg. 2016/679); ePrivacy Directive 2002/58/EC Art. 5(3); Consumer Rights Directive 2011/83/EU; EAA 2019/882 Art. 4(5).
United States (US)	**Low**	**Medium** (State laws / "Banker" term)	**Low-Medium** (State Sales Tax)	UIGEA 31 U.S.C. § 5362; 12 CFR Part 233; FinCEN 31 CFR § 1010.100(ff); State laws (UT, WA, CA Penal Code § 330).

4. Question 4: Online Poker Sites' Terms on Real-Time Assistance (RTA) and Prohibited Software

Assessed Risk Level: High if Riverline retains the name `"Live Decision"` mode or markets rapid in-game spot lookup; **Low** if renamed to `"Quick Spot Lookup"` / `"Post-Hand Reconstructor"` and paired with off-table gating and process checks `[Judgement]`.

While using Real-Time Assistance (RTA) generally violates private contractual Terms of Service rather than criminal statutes (unless accompanied by computer intrusion or wire fraud), being placed on the **Prohibited At All Times** software blacklist of major poker operators (PokerStars, GGPoker, 888poker, PartyPoker, WPT Global) would destroy Riverline's reputation among serious players and expose users to permanent bans and bankroll confiscation (`RIVERLINE_BRIEF.md` Principle 1 & Principle 6).

4.1 What Major Online Poker Operators Explicitly Ban

A. PokerStars (Prohibited Programs, Tools and Services Policy)

PokerStars divides third-party poker software into three strict categories (PokerStars Official Policy):

1. **Tools Permitted at All Times:**

   "Tools and services that simply report basic game state information, such as pot odds or absolute hand strength. Reference material that is static and basic in nature, such as simple table-based starting hand charts advising on what hands to play or not in unopened pots."

2. **Tools Prohibited at All Times (Bots, Auto-Folders, Screen Scrapers):**

   "Any tool or service that offers real-time advice on what action to take through reading of the current game state (a 'bot')... The use of any tool or service that scrapes data from the PokerStars tables that

could be used to input into an advanced poker calculator or website or database (whether local, on a cloud or hosted externally)."

3. **Tools Permitted for Study, But Strictly Prohibited While the PokerStars Client Is Open (Even on a Second Device):**
   Look closely at the exact verbatim language in PokerStars' Prohibited Programs Policy:

   "There are some tools and services which have legitimate uses for analyzing your game but are not appropriate for use during play. As such, their use when any of our clients, apps or software are open is prohibited. We determine that it's irrelevant whether these tools are used when you have no tables open, or you are calculating or referencing material before or after a decision. An advantage is gained by using these tools even if it does not directly relate to the decision you are currently facing on the tables. ***This rule applies whether one or more devices are being used.****"*
   "Typically, these fall under the following categories:
   - Reference material that provides advice that goes beyond a basic level, such as a large collection of tables offering recommendations beyond whether to play certain hands or not in unopened pots.
   - ***Tools or services designed specifically to ease referral to reference material.***
   - ***Tools or services that compute advanced equity calculations, such as GTO strategies, range vs range simulators (node locking), ICM or Nash Equilibrium-based programs.***
   - The use of any AI models to get advice on what action to take on a table.
   - Any Game Theory Optimal (GTO) solution available from any source, whether a website, subscription service, server, database, etc."

B. GGPoker Network (Security & Ecology Policy & Section 4 RTA Terms)

GGPoker enforces an even stricter definition of Real-Time Assistance across the entire GG Network (PokerNews Verbatim Extract of GGPoker Section 4):

"- Any decision made at the poker table must be made solely by you. Humans must decide what action to take and the exact size of any bet or raise
- ***Use of any software and/or reference material that provides advice and/or has an influence on your decision-making in real-time is strictly prohibited***
- ***Prohibited software includes, but is not limited to, GTO solvers, range calculators, and ICM analyzers***
- ***Prohibited reference materials are solutions/solves from simulations, e.g., GTO charts, range calculation, ICM equity, decision trees, Nash Equilibrium, or push/fold charts***
- The following reference material is allowed: a basic preflop chart that defines starting hands to play from each position. ***If the reading material contains stack size, relative positions, or any user-defined situations, then it is not permitted***
- Actions taken for breaches: ***PERMANENT BAN, CONFISCATION****"*

4.2 Why Riverline's "Live Decision" Mode Must Be Refactored (`[Judgement]`)

In `RIVERLINE_BRIEF.md` Principle 6, the project brief states:

"6. ***Study tool, not real-time assistance.*** *A quick 'live decision' mode may exist only with strong warnings; hard limits: no overlays on poker clients, no reading poker-client screens or hand histories in real time, nothing built to evade site detection, no marketing implying in-game use."*

[Judgement] Under the verbatim rules of both PokerStars and GGPoker quoted above, **manual-input RTA is banned just as strictly as automated screen-scraping RTA** (PokerNews RTA Policy Analysis). Specifically: 1. PokerStars explicitly bans *"Tools or services designed specifically to ease referral to reference material"* and *"Tools or services that compute advanced equity calculations, such as GTO strategies, range vs range simulators"*, even when inputted manually on a second device (like a phone or web browser). 2. GGPoker explicitly bans any reading material or software that *"contains stack size, relative positions, or any user-defined situations"* during play. 3. If Riverline includes a screen or button literally titled **"Live Decision"**, warnings alone

will not prevent poker security teams (or Apple App Review under Guideline 5.3) from concluding that the feature was **designed to ease real-time referral during a live hand**.

Five Concrete Requirements for Riverline to Remain Clearly in the "Permitted When Client Is Closed" Study Category (`[Judgement]`): 1. **Rename "Live Decision" Mode:** Rename the feature in code, UI, and documentation to **"Quick Spot Lookup"** (`בדיקת מצב מהירה` / `Быстрый разбор ситуации`) or **"Post-Hand Spot Reconstructor"**, framed as a fast way to reconstruct a hand *immediately after a live session or home-game hand concludes* while memory is fresh. 2. **Never Restrict Process Visibility or Window Titles (Zero Stealth):** Never obfuscate the Electron process name (`Riverline.exe`) or browser `title` element (`Riverline — Poker Study Workstation`). Poker clients scan active window titles and running processes; any attempt to disguise a window title is treated by PokerStars as an *"attempt to bypass our detection measures"*, which triggers immediate fund confiscation (PokerStars Prohibited Programs Policy). 3. **Add Desktop Process-Detection Self-Lock (Industry Safe Harbor):** As PokerStars' policy explicitly acknowledges: *"We are aware that some poker tools and calculators restrict their functionality if they detect our software running. This is to prevent their users being barred from play on our site."* In the Electron desktop app, polling the local OS process list (without reading any memory of other processes) and pausing the Strategy/Equity/Solver views with a calm banner if `PokerStars`, `GGPoker`, `888poker`, `partypoker`, or `WPTGlobal` is running places Riverline in the highest-trust tier of legitimate study tools (alongside GTO Wizard, PioSOLVER, and HRC). 4. **Enforce a Mandatory Click-Through Off-Table Attestation on Web & Mobile:** Because web browsers and mobile sandboxes cannot inspect other running apps, require users opening the Quick Spot Lookup or Solver modules on Web/iOS/Android to acknowledge a persistent banner and session-start checkbox: *"Off-Table Study Only: I confirm that no online poker client or live wagering game is currently active."* 5. **Delay / Pedagogical Framing in Quick Spot Lookup:** Present outputs in Quick Spot Lookup alongside the educational explanation, confidence tier (`Exact` / `Verified` / `Estimated`), and range context rather than a minimalist single-word "BET 75% NOW" action prompt.

---

5. Question 5: Required Documents for a Free App with an Optional Paid Tier and No Analytics, and What Changes with Accounts/Sync or Payments

Assessed Risk Level: Low for private friends-only local sharing; **Medium-to-High** for public web/desktop release, accounts/sync, and paid tiers under Israeli Privacy Law Amendment 13, Israeli Consumer Protection Law, GDPR, and open-source licensing rules `[Judgement]`.

5.1 Document-by-Document Requirements for the Local-First Free App (No Analytics)

Even when Riverline operates as a free, local-first web and desktop app with **zero analytics**, seven foundational legal and compliance documents/notices should be included in the app footer and Settings/About menu:

1. Privacy Policy (`מדיניות פרטיות` / `Политика конфиденциальности`)

- **Why Required Even Without Accounts or Analytics:** When a user loads a web application or checks for updates in an Electron app, the web host or Content Delivery Network (CDN, e.g., Cloudflare, Vercel, GitHub Pages) automatically receives the user's **IP address, HTTP User-Agent, and request timestamps** in server security logs. Under both **GDPR Article 4(1)** and **Israel's Protection of Privacy Law, 5741-1981 (as amended by Amendment 13, effective August 14, 2025)**, an IP address or online identifier constitutes **"personal information" (`מידע אישי`)** (INPLP Amendment 13 Analysis; ALAW Amendment 13 Guide). Furthermore, both Apple App Store Guideline 5.1.1(i) and Google Play's User Data Policy mandate a Privacy Policy link for *every* app, even if it collects zero user data.
- **What It Must State in the Local-First Phase:**
- Controller identity and contact email (Developer name, city/country: Israel, contact email).
- Explicit statement that all study hands, personal strategies, drill history, and Game Night logs are stored **100% locally on the user's device** (`localStorage` / `IndexedDB`) and are never transmitted to Riverline

servers.

- Disclosure of minimal technical server logs (IP address, browser headers) processed by the static web host strictly for network delivery and DDoS/security protection, along with their retention period.
- Statement that Riverline uses **zero third-party analytics, zero ad networks, and zero cross-site tracking**.

2. Cookie & Local-Storage Notice (הודעת אחסון מקומי / Уведомление о локальном хранилище)

- **Statutory Basis (EU ePrivacy Directive 2002/58/EC Article 5(3)):** As quoted in Section 3.2 above, Article 5(3) of the ePrivacy Directive exempts technical storage on a user's terminal equipment (including `localStorage` and `IndexedDB`) from prior opt-in consent when it is **"strictly necessary in order to provide an information society service explicitly requested by the subscriber or user."**
- **Practical Implementation (`[Judgement]`):** Because Riverline has no analytics or marketing cookies, **do not add an annoying cookie-consent banner**. Instead, include a dedicated **"Local Storage & Zero-Tracking Notice"** section inside the Privacy Policy and a brief note in the app's Settings screen listing the exact local storage keys used (e.g., language `EN/RU/HE`, Motion preference `Instant/Faster/Standard/Reduced`, saved hands, personal strategy ranges, and offline session logs) alongside a one-click **"Export / Wipe All Local Data"** button.

3. Terms of Service / End-User License Agreement (תנאי שימוש / Пользовательское соглашение)

- **Core Clauses Required from Day 1 (`[Judgement]`):** 1. **Age Eligibility (18+ / 21+):** User represents and warrants that they are at least 18 years of age (or 21+ where required by local jurisdiction). 2. **Educational & Study Scope (No Gambling):** Riverline is an educational probability and strategy workstation; no real money is wagered, no prizes are offered, and virtual chips/points have zero monetary value. 3. **Strict Prohibition on Real-Time Assistance (RTA):** User agrees never to use Riverline while any real-money or play-money poker client or live wagering game is active, and acknowledges sole responsibility for complying with third-party poker operator rules. 4. **Confidence Tiers & Limitation of Liability ("Honesty Is the Brand"):** Explains Riverline's four confidence tiers (`Exact`, `Verified`, `Estimated`, `Unavailable` per `RIVERLINE_BRIEF.md` § 2.1), states that poker involves variance and risk of loss if played elsewhere, and disclaims all liability for financial losses incurred by users in external games. 5. **Game Night Score Reconciler Disclaimer:** States that the Game Night module is a local arithmetic calculator for unitless points/stacks; Riverline does not organize games, process payments, verify legal compliance under Section 230 of the Israeli Penal Law or foreign laws, or enforce private obligations. 6. **Intellectual Property & Governing Law:** Reserves copyright in Riverline's code, design, and Chippy illustrations (until and unless an open-source license is formally adopted), and specifies Israeli law and the competent courts of the Central / Tel Aviv District as governing law (subject to mandatory consumer-protection laws in the user's country of residence).

4. Licences & Third-Party Notices (רישיונות קוד פתוח / Лицензии открытого ПО)

- **Why Critical (`RIVERLINE_BRIEF.md` § 2.7 & § 5):** Riverline's Principle 7 mandates recording every outside component's license before use.
- **Electron & Runtime Dependencies:** Shipping an Electron desktop app requires bundling the `LICENSES.chromium.html` and Electron MIT license notice (auto-generated by Electron packagers) and listing all npm/runtime dependencies (MIT, ISC, BSD-2-Clause, BSD-3-Clause, Apache-2.0) in an accessible `About > Open Source Licences` view.
- **Solver Output Licensing Analysis (`[Judgement]` — Flagged for IP Lawyer Verification):**
- **`b-inary/postflop-solver` (GNU AGPLv3):** Under GNU AGPLv3 Section 13, if a modified or unmodified AGPLv3 program is run on a server and users interact with it remotely over a computer network, or if AGPLv3 code is linked/compiled (e.g., via WebAssembly) into the distributed Riverline client app, the **entire corresponding source code** must be licensed and released under AGPLv3. However, if `b-inary/postflop-solver` is executed **strictly offline on the developer's private workstation** at build time to compute mathematical Nash Equilibrium / EV numerical outputs, and **only the resulting pure numerical data tables**

(containing zero copyrightable source code or templates from the solver) are packaged into Riverline, the Free Software Foundation's longstanding GPL FAQ confirms that the output of a program is not covered by the GPL/AGPL unless the output itself is a derivative work of the program's code. Furthermore, pure mathematical equilibrium frequencies are uncopyrightable facts/discoveries in US and Israeli copyright law (though database rights exist in the EU under Directive 96/9/EC for substantial investment, which would belong to the person running the computations). **[Judgement]** To preserve the option of keeping Riverline closed-source (`RIVERLINE_BRIEF.md` § 1), **never bundle any `postflop-solver` code/WASM inside the app and never run `postflop-solver` on a backend API queried by users**. Still, include a courteous attribution in the documentation crediting `b-inary/postflop-solver` as an offline research benchmark.

- **Commercial Solvers (HRC Pro, PioSOLVER, GTO+, Simple Postflop):** As noted in `RIVERLINE_BRIEF.md` § 5, commercial solvers frequently include contractual EULA clauses restricting commercial redistribution of bulk exported databases without a commercial data license; never ship bulk outputs from proprietary solvers without written vendor permission.
- **Fonts & Audio Assets:** Include the **SIL Open Font License (OFL 1.1)** notices for any bundled web/desktop fonts (e.g., Inter, Noto Sans, Noto Sans Hebrew) and maintain a clean provenance log (`AUDIO_LICENSES.md`) for every sound recording (`RIVERLINE_BRIEF.md` § 4).

5. Study-Tool & Anti-RTA Disclaimer

- Dedicated prominent notice on the landing screen, footer, and Quick Spot Lookup modal (exact trilingual text provided in Section 7.4 below).

6. Accessibility Statement (הצהרת נגישות / `Заявление о доступности`)

- **Israeli Law (Equal Rights for Persons with Disabilities Regulations (Service Accessibility Adjustments), 5773-2013, Regulation 35 & IS 5568):**
  Under Regulation 35, Israeli websites and applications providing a "public service" (including commercial/educational web services) must conform to **Israeli Standard 5568 (IS 5568)**, which adopts **WCAG 2.0 Level AA**, and publish an Accessibility Statement (הצהרת נגישות).
  Crucial Statutory Exemption for Small Developers: Under Regulation 35(e) and the 2017 amendments (Access Israel Guide; WebX97 Small Business Accessibility Guide):

  > *"פטור לחלוטין מנגישות — עוסק פטור או לעסק עם מחזור שנתי ממוצע שאינו עולה על ₪ 100,000."*
  > *(Translation: An exempt dealer [Osek Patur] or a business with an average annual turnover not exceeding NIS 100,000 is completely exempt from web accessibility.)*
  > *(Note: Businesses with average annual turnover between NIS 100,000 and NIS 300,000 are also eligible for a renewable 3-year exemption upon self-certification.)*

- **EU Law (European Accessibility Act, Directive (EU) 2019/882, Article 4(5)):**
  As quoted in Section 3.2, microenterprises (fewer than 10 employees and under EUR 2 million turnover) providing services are statutorily exempt from the EAA.
- **Why Riverline Should Still Publish an Accessibility Statement (`[Judgement]`):** In Israel, serial plaintiffs send automated demand letters to website owners lacking an הצהרת נגישות. Publishing a clear **Accessibility Statement** that (a) explicitly cites the statutory exemption under Regulation 35 for a solo developer / turnover under NIS 100,000 and EU Directive 2019/882 Art. 4(5), (b) documents the extensive accessibility features Riverline *already* builds in (`RIVERLINE_BRIEF.md` § 4: WCAG ≥4.5:1 contrast, global Motion setting with `Reduced`/`Instant` modes, keyboard-first navigation, semantic DOM, and full Hebrew RTL / English-Russian LTR support), and (c) provides a direct contact email for accessibility feedback, neutralizes nuisance demand letters immediately.

7. Contact Information (יצירת קשר / `Контакты`)

- Required by Apple Guideline 1.5, Google Play Developer requirements, Israel Protection of Privacy Law Section 11, and EU e-Commerce Directive 2000/31/EC Art. 5. In the free phase, provide the developer's

name, city/country (Israel), and a dedicated support/privacy email address (`support@...` or `legal@...`).

5.2 What Changes When Optional Accounts / Cloud Sync (Supabase) Are Added

Adding optional user accounts, cloud synchronization (via Supabase), or community hand-sharing transforms Riverline from a local client into a **Database Controller (בעל שליטה במאגר מידע)** under Israeli law and a **Data Controller** under GDPR:

1. **Israel Protection of Privacy Law (PPL) Section 11 & Amendment 13 Enforcement (High Priority):**
   On August 14, 2025, **Amendment 13 to Israel's Protection of Privacy Law, 5741-1981** entered into force, empowering the Israeli Privacy Protection Authority (PPA) to impose statutory administrative fines (INPLP Report on Israel's First Administrative Fines under Amendment 13, Oct 2026; Gov.il Amendment 13 Q&A). Two of the PPA's very first enforcement fines in August–September 2026 directly illustrate what Riverline must do before enabling a registration form or Supabase backend (INPLP Enforcement Report):

   > *"**A.D Karting Hutzot (2014) Ltd. (August 2026).** Following a complaint filed in December 2025, the PPA fined a karting business NIS 12,000 for breaching the notice duty under Section 11 of the PPL... The company's terms of use and privacy policy omitted the identity and contact details of the controller, the purposes of use, the recipients or categories of recipients, and the individual's access and rectification rights; a full privacy policy was not even available on the website when the complaint was filed..."*
   > *"**Beit Shemesh Municipality (September 2026).** The PPA imposed a NIS 64,000 sanction... First, a supplier that had provided support and information-processing services with continuous access to the welfare database systems for nearly two years qualified as a holder, yet was not identified as such in the database definitions document, contrary to Regulation 2(a)(7)... Second, the municipality's information security procedure failed to regulate the obligations required for engagements with external parties granted access to the database... contrary to Regulation 15(a)(3)."*

Mandatory Actions Before Enabling Supabase Accounts (`[Judgement]`): * **Update the Registration UI & Privacy Policy for Section 11 PPL and GDPR Art. 13:** Right at the account sign-up prompt, link to the Privacy Policy and explicitly state all five mandatory Section 11 elements (Gov.il Duty to Notify): (1) that creating an account is completely voluntary and the consequence of not providing an email is simply remaining in local-only mode; (2) the exact purpose of collection (cross-device synchronization of study data and account authentication); (3) the identity and contact email of the Database Controller (בעל השליטה במאגר המידע); (4) the categories of recipients/holders (מחזיקים, specifically naming Supabase Inc. and its cloud region, and disclosing cross-border data transfer outside Israel under the Privacy Protection Regulations (Transfer of Data Abroad), 5761-2001); and (5) the user's statutory right to inspect (זכות עיון, Section 13) and correct or delete (זכות תיקון ומחיקה, Section 14) their personal data. * **Execute a Written Holder / Processor Agreement (DPA) with Supabase:** Sign Supabase's Data Processing Addendum (DPA) and maintain a short internal **Database Definitions & Information Security Procedure Document** (מסמך הגדרות מאגר ונוהל אבטחת מידע) under the Israeli Privacy Protection Regulations (Information Security), 5777-2017 (Basic Security Level for an individual/small database without sensitive data, Regulations 2(a)(7) and 15). 2. **Mandatory Self-Service Account Deletion (Apple Guideline 5.1.1(v) & Google Play):**
Once account creation exists, both Apple Guideline 5.1.1(v) (*"Apps that support account creation must also offer account deletion"*) and Google Play's Account Deletion Policy strictly require: * An in-app **"Delete Account & Cloud Data"** button that permanently deletes the user's Supabase Auth record and synced database rows (not merely "deactivating" the account); and * A **publicly accessible web URL** where a user who uninstalled the app can request or trigger account deletion. 3. **User-Generated Content (UGC) Moderation if Community Sharing Is Added (Apple Guideline 1.2 & EU DSA):**
If users can share hands publicly or post community feedback inside the app, Apple Guideline 1.2 mandates four built-in controls before App Review will approve the build:

> *"- A method for filtering objectionable material from being posted to the app*
> *- A mechanism to report offensive content and timely responses to concerns*

- *The ability to block abusive users from the service*
- *Published contact information so users can easily reach you"*

5.3 What Changes When Payments (Subscriptions / Supporter Tier / Services) Are Added

1. **Payment Processor Selection — Direct Processor (Stripe) vs. Merchant of Record (Paddle / Lemon Squeezy):**
   In Stripe's Prohibited and Restricted Businesses Policy & FAQs, Stripe states:

   > *"While gambling is typically associated with casinos, our policy on gambling includes several businesses that offer similar services. This can include games of skill (or chance) with cash prizes, sweepstakes, pay-in auctions, office pools, or charity raffles."*

Furthermore, Stripe does not currently support direct domestic merchant onboarding in Israel (without incorporating a foreign entity such as a US LLC via Stripe Atlas). **[Judgement]** For a solo developer in Israel selling digital subscriptions globally, using a **Merchant of Record (MoR)** such as **Paddle** (or **Lemon Squeezy**, or an Israeli processor like **PayPlus / Morning (Green Invoice)** for domestic ILS transactions) is substantially safer and simpler because: * An MoR acts as the legal reseller of the digital software subscription, automatically calculating, collecting, and remitting **EU VAT (via VAT OSS)**, **UK VAT**, and **US State Sales Taxes** on the developer's behalf; and * Pre-clearing Riverline with the MoR's underwriting team before launch—by demonstrating that Riverline is an educational mathematics/strategy SaaS tool with zero wagering, zero cash prizes, and zero peer-to-peer money transmission—prevents sudden account freezes. 2. **Israeli Consumer Protection Law Requirements (חוק הגנת הצרכן, התשמ"א-1981):**
If Riverline processes direct payments (or if Israeli consumer law applies alongside an MoR), two statutory provisions are strictly enforced in Israel (Chamber of Commerce Israel Statute Text; Israel Consumer Council; Meiri Law Subscription Guide): * **Section 14C (Remote Sale Disclosure & 14-Day Cancellation Right):** Requires disclosing the business name, registration/ID number (ע.מ / ח.פ.), physical address, total price including VAT, and cancellation rights before checkout. Consumers may cancel a remote service transaction within **14 days** of contracting (extended to **4 months** for senior citizens aged 65+, persons with disabilities, and new immigrants under Section 14C1), subject to a maximum cancellation fee of 5% of the transaction price or NIS 100, whichever is lower (Law-Tip 14-Day Guide). * **Section 13D & Section 14I (Continuous Service Subscription Cancellation):** For recurring subscriptions (עסקה מתמשכת), Section 13D(c) mandates: > "חוזה בעסקה מתמשכת יסתיים בתוך שלושה ימי עסקים מיום שנמסרה הודעת ביטול לפי הוראות סעיף 14ט..."
> *(Translation: A contract in a continuous transaction shall terminate within three business days from the day a cancellation notice was delivered in accordance with Section 14I...)*
Section 14I requires providing a prominent, dedicated **"Cancel Subscription / Transaction" (ביטול עסקה)** link on the homepage and allowing cancellation via online form, email, and telephone/written notice without dark patterns. 3. **EU Consumer Rights Directive (Directive 2011/83/EU Art. 9 & Art. 16(m)):**
EU consumers have a 14-day statutory right of withdrawal from digital subscriptions unless, at checkout, the consumer gives **prior express consent** to immediate performance of the digital service and acknowledges that they thereby lose their right of withdrawal (which Merchant of Record checkouts like Paddle handle automatically).

Document / Compliance Artifact	Phase 1: Friends Beta (Local Only)	Phase 2: Public Web (Free, Local Only)	Phase 3: Accounts / Sync (Supabase)	Phase 4: Paid Tier / App Stores
Study-Tool & Anti-RTA Disclaimer	**Required** (In-app modal & footer)	**Required** (Landing page, modal, footer)	**Required**	**Required** (+ App Review Notes)

Document / Compliance Artifact	Phase 1: Friends Beta (Local Only)	Phase 2: Public Web (Free, Local Only)	Phase 3: Accounts / Sync (Supabase)	Phase 4: Paid Tier / App Stores
Game Night Points-Only Notice	**Required** (Inside Game Night view)	**Required** (Inside Game Night view)	**Required** (Never sync ledgers)	**Required** (Points/Chips UI only)
Privacy Policy (PPL § 11 & GDPR)	Basic 1-page local-only notice	**Required** (Covers CDN/IP logs & local storage)	**Mandatory Upgrade** (Full PPL § 11 + GDPR Art. 13 + DPA)	**Mandatory Upgrade** (+ Payment processor & Store disclosures)
Local Storage Notice (ePrivacy Art. 5(3))	Optional	**Required** (Informational notice; no banner needed)	**Required** (+ Auth session token disclosure)	**Required** (+ Checkout fraud-cookie disclosure)
Terms of Service (ToS / EULA)	Short beta agreement	**Required** (18+, No Gambling, Anti-RTA, Liability)	**Required** (+ Account termination & UGC rules)	**Mandatory Upgrade** (IL § 14C/13D & EU refund/cancellation)
Open-Source Licences & Notices	Recommended	**Required** (Electron/Chromium + npm MIT/BSD)	**Required**	**Required** (Verify offline AGPL solver separation)
Accessibility Statement (IS 5568 / EAA)	Not required	**Strongly Recommended** (Cites Reg. 35 & EAA exemptions)	**Strongly Recommended**	**Required** once turnover > NIS 100k/300k
In-App & Web Account Deletion	N/A	N/A	**Mandatory** (PPL § 14, GDPR Art. 17)	**Mandatory** (Apple 5.1.1(v) & Google Play)

6. Question 6: Age Restrictions — Should Riverline Be 18+ (or 21+ in Places)? How Do Stores and Laws Treat Poker Study Content for Minors?

Assessed Risk Level: Medium — While pure mathematical and strategy education is not a criminal offense for minors under Israeli, US, or EU statutes, **Riverline should strictly adopt an 18+ age threshold globally (and 21+ where required by local jurisdiction)** across its Terms of Service, onboarding gate, and store target-audience settings `[Judgement]`.

6.1 Statutory Treatment of Poker Study Content vs. Real-Money Gambling for Minors

1. **Israel (Penal Law Section 231A & Capacity and Guardianship Law, 5722-1962):**
   Under Section 231A(a) of the Israeli Penal Law, the criminal offense regarding minors applies specifically to offering, selling, or distributing lottery or betting tickets (כרטיסים... הבאים להעיד על זכות להשתתף בהגרלה או בהימור) to a minor under 18 (punishable by up to six months' imprisonment), and National Lottery / ISBB permits prohibit advertising gambling products to minors or on media intended for minors. Reading a book on poker probability or using an offline math calculator is not a criminal offense for a minor in Israel. **However**, under Israel's Capacity and Guardianship Law, 5722-1962 (חוק הכשרות המשפטית והאפוטרופסות, תשכ"ב-1962), a person under 18 is a minor (קטין) whose legal acts and financial/contractual commitments are voidable without parental consent, and under **Amendment 13 to the Protection of Privacy Law**, collecting

personal data of minors without verified parental notice/consent attracts heightened PPA enforcement (as seen in the August 2026 *A.D Karting* fine involving minor child data, INPLP Enforcement Report).

2. **United States (COPPA, State Contract Law, and 21+ Casino Jurisdictions):**
   In the United States, pure educational material about card games is protected under the First Amendment even for minors. However: * The **Children's Online Privacy Protection Act (COPPA, 15 U.S.C. §§ 6501–6506)** imposes strict federal liability on any website or online service directed to children under 13 (or having actual knowledge that it is collecting personal information from a child under 13), and state privacy laws (such as CCPA/CPRA in California) require opt-in consent for users aged 13–16. * While the age of contractual majority is 18 in most US states (19 in Alabama and Nebraska; 21 in Mississippi), the legal age to participate in real-money casino or online poker in most US states (e.g., Nevada, New Jersey, Pennsylvania, Michigan, West Virginia) is **21+**. Consequently, US-facing social casino and poker apps routinely state in their store listings: *"Intended for an adult audience (18+ or 21+ where applicable) for educational/entertainment purposes only."*
3. **European Union & Russia:**
   * **EU GDPR Article 8:** Requires verifiable parental consent to process personal data of children under **16** (or between 13 and 16 depending on Member State derogation) for information society services. * **Russian Federation (Federal Law No. 436-FZ "On Protection of Children from Information Harmful to Their Health and Development"):** Categorizes information capable of inducing children to participate in gambling (`способная вызвать у детей желание принять участие в азартных играх`) as **18+ prohibited for children** (`Запрещено для детей — 18+`). Any Russian-language poker interface lacking an explicit `18+` badge risks immediate blocking under Federal Law No. 436-FZ and 149-FZ.

6.2 How Apple App Store and Google Play Treat Poker Study Content for Minors

As established in Section 1: * On the **Apple App Store**, if Riverline's interactive hand-play drills or reconstructions are classified by App Review as *Frequent/Intense Simulated Gambling*, Apple forces a **17+ global age rating** (MacRumors), plus regional **R18+ in Australia**, **18+ in France** (Apple Developer News), and **19+ (GRAC required) in South Korea**. Even *Infrequent/Mild Simulated Gambling* triggers **R18+ in Australia**. * On **Google Play**, selecting any target audience bracket under **18+** in Play Console's Target Audience and Content settings for an app that teaches or simulates poker will trigger policy rejection.

6.3 Definitive Age-Rating Recommendation (`[Judgement]`)

[Judgement] Set Riverline's minimum age to 18+ globally (and 21+ in jurisdictions where 21 is the minimum legal age for poker/gaming content or contractual capacity). Restricting Riverline to adults (18+/21+): 1. Completely insulates the developer from COPPA (US), GDPR Article 8 (EU), Israeli PPL minor-data scrutiny, and Russian Federal Law No. 436-FZ (`18+`); 2. Ensures that every user who accepts the Terms of Service, anti-RTA covenant, liability disclaimer, or paid subscription has full adult legal capacity; 3. Prevents public-relations or regulatory backlash that would arise if high-school minors used the "Game Night" organiser to track home poker games; and 4. Aligns seamlessly with Apple's `17+ / 18+` and Google Play's `18+ Target Audience` requirements.

---

7. Actionable Checklists and Trilingual Disclaimer Wording (EN / HE / RU)

7.1 Checklist 1: Before Sharing with Friends (Private Beta / Local-First Build)

- [ ] **Rename "Live Decision" Mode:** Change all UI labels, route names, and button text from `"Live Decision"` to **"Quick Spot Lookup"** or **"Post-Hand Reconstructor"**.
- [ ] **Convert "Game Night" to Points / Chips-Only Mode:** Strip all currency symbols (`₪`, `$`, `€`, `₽`) and replace `"Buy-in"`, `"Cash-out"`, `"Money Owed"`, and `"Pay via Banker"` with **"Initial Stack (pts)"**, **"Reload (pts)"**, **"Final Stack (pts)"**, **"Net Score Delta"**, and **"Coordinator Point Reconciliation"**.

- [ ] **Verify Zero Rake Inputs:** Confirm there is no field or toggle for calculating rake, house percentage, or hosting fees in Game Night or Table Rules.
- [ ] **Add First-Run 18+ & Study-Only Onboarding Modal:** Require friends/testers to click *"I am 18+ and understand Riverline is an off-table poker study tool with no real-money play"* (stored in `localStorage`).
- [ ] **Embed Trilingual Footer / About Disclaimers:** Place the Study-Tool Disclaimer, Anti-RTA Rule, and Game Night Disclaimer (Section 7.4 below) in the `About / Legal` panel in English, Hebrew, and Russian.
- [ ] **Verify 100% Local Persistence:** Confirm that the Supabase client in the codebase (`RIVERLINE_BRIEF.md` § 3) is completely disabled/inert in the friends build so zero personal data or session logs leave the user's browser/desktop.

7.2 Checklist 2: Before a Public Web & Desktop Release (Free Tier, Accounts/Sync, and Paid Tier)

- [ ] **Publish Full Privacy Policy (Israel PPL Section 11 / Amendment 13 & GDPR Art. 13):** Include controller name, Israeli contact email, voluntary vs. mandatory data disclosure, exact purposes, recipients/holders (e.g., CDN host, Supabase, Merchant of Record), cross-border transfer notice, and statutory access/rectification/deletion rights (זכות עיון ותיקון).
- [ ] **Publish Local Storage Notice (ePrivacy Art. 5(3)):** Document all `localStorage` and `IndexedDB` keys as strictly necessary user-requested storage and include a one-click **"Wipe All Local Data"** button in Settings.
- [ ] **Publish Complete Terms of Service (ToS):** Include 18+/21+ representation, No-Gambling clause, strict Anti-RTA covenant, Confidence Tiers (`Exact`, `Verified`, `Estimated`, `Unavailable`) & No-Guarantee disclaimer, Game Night calculator waiver, and Israeli governing law.
- [ ] **Publish Accessibility Statement (הצהרת נגישות):** State the statutory small-business exemption under Israeli Regulation 35 (under NIS 100,000 turnover) and EU Directive (EU) 2019/882 Art. 4(5) (microenterprise), list built-in accessibility features (WCAG ≥4.5:1 contrast, Motion setting `Instant/Faster/Standard/Reduced`, keyboard support, RTL/LTR), and provide an accessibility contact email.
- [ ] **Audit Open-Source Licences & Solver Pipeline:** Generate third-party license notices for Electron/Chromium and npm packages; verify that `b-inary/postflop-solver` (AGPLv3) runs **strictly offline** at build time and that zero AGPL source/WASM code is shipped in the client bundle or run on a network server; verify audio and font licenses (`SIL OFL 1.1`).
- [ ] **Russian Censorship Shield (`18+` & Zero Poker-Room Links):** Add a `18+` badge to the Russian interface, ensure zero links, logos, or promo codes to online poker sites exist anywhere in the app, and state in the ToS that the Russian translation is for global Russian speakers rather than targeting the Russian Federation.
- [ ] **Desktop Electron Anti-RTA Self-Lock (Recommended Safe Harbor):** Add an optional/default local process-name check in the Electron host that pauses solver/strategy screens if `PokerStars`, `GGPoker`, `888poker`, or `partypoker` is running.
- [ ] **Before Enabling Supabase Accounts/Sync:** Execute Supabase's Data Processing Addendum (DPA), draft a basic internal Israeli Information Security Procedure document (מסמך הגדרות מאגר), and build a self-service **"Delete Account & Cloud Data"** button inside the app and on the web.
- [ ] **Before Enabling Paid Tier / Supporter Payments:**
- [ ] Register as an **Osek Patur** or **Osek Murshe** (or Ltd. company) with the Israel Tax Authority and National Insurance.
- [ ] Onboard with a Merchant of Record (e.g., **Paddle** or **Lemon Squeezy**) with pre-approval as *"Educational Game-Theory & Probability Software"*, ensuring bank descriptors do not trigger Bank of Israel Procedure No. 411.
- [ ] Label voluntary support as **"Supporter Tier" (מסלול תומכים)** or **"Creator Tip"**, never **"Donation" (תרומה)**.

- [ ] Implement Israeli Consumer Protection Law Section 14C (14-day cancellation disclosure) and Section 13D / 14I (prominent ביטול עסקה **/ Cancel Subscription** button stopping billing within 3 business days).

7.3 Checklist 3: Before an Apple App Store & Google Play Store Release

- [ ] **Category & Age Rating Configuration:**
- [ ] Select *Education* or *Reference* (or *Games > Card / Strategy* if drills dominate) consistently.
- [ ] Answer App Store Connect and Google Play IARC questionnaires accurately; if interactive virtual-chip drills are included, declare *Simulated Gambling* (expecting **17+ globally**, **R18+ in Australia**, **18+ in France**, and **PEGI 18**).
- [ ] Set Google Play **Target Audience** to **18 and over only**.
- [ ] Deselect **South Korea** in App Store Connect and Google Play unless a Korean GRAC Rating Classification Number has been obtained; consider deselecting jurisdictions with strict blanket card-app bans (e.g., China mainland, UAE, Saudi Arabia).
- [ ] **4+ Compliant Storefront Metadata (Apple Guideline 2.3.8):** Ensure app icons, screenshots, and preview videos display probability grids, hand trees, and unitless big-blind (`bb`) or point numbers—zero currency symbols (`$`, ₪), zero casino/betting slogans, and zero real-person PII.
- [ ] **In-App Purchase (IAP) Compliance (Apple Guideline 3.1.1 & Google Play Billing):** Route all in-app subscriptions and digital "Supporter Tips" on iOS and Android through native StoreKit / Google Play Billing APIs (and enroll in the 15% App Store Small Business Program and Google Play 15% service fee tier). Remove external web checkout links from inside the mobile builds unless strictly compliant with regional entitlement rules.
- [ ] **In-App & Web Account Deletion (Apple Guideline 5.1.1(v) & Google Play):** Verify that the in-app account deletion flow works without requiring users to email support, and paste the web account-deletion URL into Google Play Console's Data Safety form.
- [ ] **UGC Moderation Controls (Apple Guideline 1.2):** If community hand sharing or comments are enabled in the mobile app, verify that profanity filtering, a "Report Hand/Comment" button, and a "Block User" button are live and testable by reviewers.
- [ ] **Include Detailed App Review Notes (Apple Guideline 2.3.1(a)):** Provide a demo account (if login exists) and paste a clear compliance note for the reviewer explaining that Riverline is an offline probability/strategy trainer with zero real-money gambling, zero cash prizes, zero RTA capabilities, and a purely unitless point calculator for study sessions.

7.4 Recommended Trilingual Disclaimer Wording (Copy-Paste Ready)

A. General Study-Tool, Age (18+), and No-Gambling Disclaimer (Footer, Onboarding & Store Listing)

- **English (EN):**

  18+ Educational Study Tool Only — No Gambling. *Riverline is an educational mathematics, game-theory, and post-session hand analysis workstation for No-Limit Texas Hold'em. Riverline does not offer real-money gambling, wagering, or an opportunity to win real money or prizes. All quantities displayed in training drills (`bb`, `chips`, `pts`) are strictly mathematical units with zero monetary value and cannot be purchased, transferred, or cashed out. Practice or analytical results in Riverline do not imply or guarantee future success in any real-money game. Intended strictly for adults aged 18+ (or 21+ where required by local law).*

- **Hebrew (HE — עברית):**

  כלי לימוד ותרגול מתמטי בלבד (+18) — ללא הימורים. *Riverline היא סביבת לימוד, אימון וניתוח מתמטי-אסטרטגי למשחק טקסס הולדם. האפליקציה אינה מציעה משחקים על כסף אמיתי, הימורים, הגרלות או אפשרות לזכות בכסף, הם יחידות חישוב (נקודות או צ'יפים וירטואליים, `bb`) בשווה כסף או בטובת הנאה כלשהי. כל הערכים המוצגים בתרגולים*

מתמטיות בלבד ללא כל ערך כספי, ולא ניתן לרכוש אותם, להעבירם או לפדותם. כל הנתונים האנליטיים מסווגים לפי רמת הוודאות שלהם (`Exact`, `Verified`, `Estimated`, `Unavailable`) ומוצגים למטרות לימוד בלבד. השימוש מיועד לבגירים מעל גיל 18 בלבד (או 21+ בתחומי שיפוט המחייבים זאת).

- **Russian (RU — `Русский`):**

  18+ Только для обучения и математического анализа — без азартных игр. *Riverline — это обучающая рабочая станция для математического анализа, изучения теории игр и разбора раздач после игры. Приложение не организует и не проводит азартные игры, не принимает ставки и не предоставляет возможности выиграть реальные деньги, имущество или иные призы. Все числовые значения в тренировочных режимах (`bb`, очки, условные фишки) являются исключительно расчетными единицами, не имеют денежной ценности и не подлежат покупке, обмену или выводу. Результаты обучения в Riverline не гарантируют успеха в какой-либо игре. Предназначено исключительно для совершеннолетних пользователей (18+, либо 21+ в соответствии с местным законодательством).*

B. Anti-RTA / Off-Table Study Attestation Modal (Launch & Quick Spot Lookup Gate)

- **English (EN):**

  Off-Table Study Only — Prohibited During Live Play (Anti-RTA Notice). *Riverline is designed strictly for off-table study and post-hand review. Major online poker operators and live card rooms strictly prohibit consulting equity calculators, range matrices, or strategy reference tools while a game or poker client is open (even on a secondary device). By continuing, you confirm that all poker clients and live games are closed and accept sole responsibility for complying with the terms of service of any platform you use.*

- **Hebrew (HE — `עברית`):**

  לשימוש לימודי מחוץ לשולחן בלבד — איסור סיוע בזמן אמת (RTA). *Riverline מיועדת ללימוד וניתוח לאחר סיום המשחק בלבד. פלטפורמות פוקר מקוונות וחדרי קלפים אוסרים באופן מוחלט על שימוש במחשבוני סיכויים, טבלאות טווחים או כלי עזר אסטרטגיים בזמן שתוכנת משחק פתוחה או במהלך משחק חי (גם ממכשיר נפרד). בהמשך השימוש, הנך מאשר/ת כי כל תוכנות המשחק סגורות וכי האחריות לעמידה בתנאי השימוש של כל צד שלישי חלה עליך בלבד.*

- **Russian (RU — `Русский`):**

  Только для анализа вне игры — запрет на подсказки в реальном времени (Anti-RTA). *Riverline предназначена исключительно для обучения и разбора раздач после завершения сессии. Правила покер-румов строго запрещают использование калькуляторов эквити, таблиц диапазонов и любых справочных материалов при открытом игровом клиенте (в том числе на втором устройстве). Продолжая работу, вы подтверждаете, что все игровые клиенты закрыты, и несете полную ответственность за соблюдение правил сторонних платформ.*

C. "Game Night" Score & Stack Log Disclaimer (Displayed Inside the Game Night Module)

- **English (EN):**

  Local Score Calculator Only: *The Game Night tool is a local mathematical calculator for tracking unitless session points or chip counts on your device. Riverline does not organize games, process payments, move money, or verify the legality of any private gathering. Users are solely responsible for complying with all applicable laws in their jurisdiction (including Section 230 of the Israeli Penal Law, which prohibits commercial games, rake, and non-social wagering). Never use this tool to record unlawful gambling debts.*

- **Hebrew (HE — `עברית`):**

  מחשבון ניקוד מקומי בלבד: *מודול "ערב משחק" הוא כלי חישוב מתמטי מקומי לתיעוד נקודות או ספירת צ'יפים על גבי המכשיר שלך בלבד. Riverline אינה מארגנת משחקים, אינה סולקת או מעבירה כספים, ואינה מוודאת את חוקיותו של*

מפגש פרטי כלשהו. האחריות המלאה לעמידה בהוראות החוק החל (לרבות סעיפים 224–230 לחוק העונשין, התשל"ז-1977, האוסרים על משחקי מזל על כסף או טובת הנאה מעבר לגדר שעשוע בחוג חברים סגור ובמקום שאינו מוחזק למשחקים אסורים) חלה על המשתמשים בלבד.

- **Russian (RU — `Русский`):**

  Локальный калькулятор очков: *Модуль «Game Night» является исключительно локальным арифметическим калькулятором для подсчета условных очков или стеков на вашем устройстве. Riverline не организует игры, не проводит платежи и не осуществляет перевод денежных средств. Пользователи самостоятельно несут полную ответственность за соблюдение законодательства своей страны в отношении проведения частных дружеских игр.*

D. Local Storage & Zero-Tracking Notice (Settings & Privacy Policy)

- **English (EN):**

  100% Local-First Storage & Zero Analytics: *Riverline does not use tracking cookies, advertising pixels, or third-party analytics. To save your study hands, personal strategy ranges, language (`EN`/`RU`/`HE`), and motion preferences (`Instant`/`Faster`/`Standard`/`Reduced`), Riverline uses your browser's built-in `localStorage` and `IndexedDB` strictly as necessary to provide the functionality you request (exempt from consent banners under Article 5(3) of EU Directive 2002/58/EC). You can export or permanently wipe all local data at any time using the button below.*

---

8. Points Requiring a Qualified Lawyer (Listed Separately)

Because this report is independent regulatory research rather than formal legal representation, the following ten specific legal questions should be reviewed by a qualified attorney (specifically an Israeli commercial, privacy, and gaming/tech lawyer, plus an open-source IP specialist where noted) prior to the corresponding release milestones:

#	Legal Issue Requiring Counsel	Milestone Gate	Specific Question for Legal Counsel
1	**Israeli Penal Law §§ 224–230 & 235 Exposure of "Game Night"**	**Before M2 / Public Web Release**	Confirm whether offering a local-only "Game Night" stack/score calculator—even with points-only framing or optional user-entered numbers—could create any aiding/abetting exposure under Penal Law § 225 + § 31 if Israeli users use it in home games that fail the narrow Section 230 social test, and review the final UI wording.
2	**AGPLv3 Clean-Room Separation for `b-inary/postflop-solver`**	**Before M3 / Shipping Solver Library**	Provide a formal IP legal opinion confirming that running `b-inary/postflop-solver` (licensed under GNU AGPLv3) strictly offline on the developer's private machine and bundling only the resulting numerical equilibrium tables into a closed-source commercial app does not trigger AGPLv3 copyleft obligations under Israeli, US, or EU copyright/database law.
3	**Commercial Solver EULAs (HRC Pro, GTO+, PioSOLVER)**	**Before M3 / Using Paid Solver Benchmarks**	Review the specific End-User License Agreements of **Holdem Resources Calculator (HRC Pro)** and any other reference solver used for "Verified" heuristic tolerances (`RIVERLINE_BRIEF.md` §§ 2.1, 5) to confirm whether using solver outputs as internal test benchmarks or shipping derived preflop ranges is contractually permitted.

#	Legal Issue Requiring Counsel	Milestone Gate	Specific Question for Legal Counsel
4	**Israel Protection of Privacy Law Amendment 13 Audit**	**Before Enabling Accounts / Cloud Sync**	Audit the final Hebrew and English Privacy Policy, the sign-up notice under Section 11 of the PPL, the Supabase Data Processing Addendum (DPA), and the mandatory internal Database Definitions & Security Procedure document (מסמך הגדרות מאגר) to prevent administrative sanctions from the Israeli PPA (INPLP Report).
5	**Israeli Consumer Protection Law (§§ 13D, 14C, 14I) Checkout Flow**	**Before Launching Paid Tier**	Review the subscription checkout disclosures, the 14-day cancellation/refund terms (Section 14C), and the placement/mechanics of the mandatory **ביטול עסקה (Cancel Subscription)** button (Section 13D / 14I) to insulate against Israeli consumer class actions.
6	**Israeli Tax Registration, VAT on Exports, and "Supporter" Structuring**	**Before Accepting First Payment / Tip**	Advise (with an Israeli CPA / tax lawyer) on registering as an *Osek Patur* vs. *Osek Murshe* or Ltd. company, zero-rating VAT on SaaS sales to foreign residents under Section 30(a)(5) of the Israeli VAT Law, and structuring "Supporter" tiers so they are never misclassified as unlawful charitable donations (תרומות).
7	**Bank of Israel Procedure No. 411 & Merchant Underwriting**	**Before Opening Business Bank / MoR Account**	Review the business description and merchant classification packet submitted to the developer's Israeli bank and Merchant of Record (e.g., Paddle) so that incoming SaaS payouts are never frozen under Bank of Israel Procedure No. 411 or the Prevention of Money Laundering Law.
8	**Israeli Accessibility Regulation 35 & IS 5568 Exemption Verification**	**Before Public Web Launch & When Revenue Grows**	Verify the exact self-declaration requirements for the Regulation 35 small-turnover exemption (under NIS 100,000 automatic exemption; NIS 100,000–300,000 declaration) (Access Israel), and schedule a formal IS 5568 (WCAG 2.0 AA) audit before annual turnover exceeds the statutory threshold.
9	**Russian Personal Data Localization (152-FZ Art. 18(5)) When Sync Launches**	**Before Enabling Accounts for Russian-Language Users**	Assess whether offering a Russian-language UI with optional cloud accounts creates practical enforcement risk under Russian Federal Law No. 152-FZ Art. 18(5) and whether geo-blocking account sign-ups from Russian Federation IP addresses is advisable.
10	**Trademark Clearance for "Riverline" and Mascot "Chippy"**	**Before Public Web / App Store Launch**	Conduct a trademark clearance search in Class 9 (downloadable software) and Class 41/42 (educational SaaS) in Israel, the US (USPTO), and the EU (EUIPO) to ensure "Riverline" and "Chippy" do not infringe existing gaming or software marks (Apple Guideline 2.3.7).
